APPLY WORKSHOP TECHNOLOGY PRINCIPLES

UNIT CODE: ENG/OS/AUT/CC/4 /05/A

Unit description

This unit describes the competencies required by an automotive Craftsperson in order to apply a wide range of workshop technology skills in their work. It involves use of different methods to produce work pieces using basic tools while observing occupational safety and health legislations, regulations and safe working practices, interpret working drawings, select appropriate techniques for a given task to achieve specified results as well as perform housekeeping.

ELEMENTS AND PERFORMANCE CRITERIA

	PERFORMANCE CRITERIA
ELEMENT These describe the key outcomes which make up workplace function	These are assessable statements which specify the required level of performance for each of the elements. Bold and italicized terms are elaborated in the Range
Use technical drawing to plan work operations	 Technical drawings and geometric symbols are read and interpreted as per <i>drawing standards</i>. Operation Plan is produced as per the technical drawings. Technical drawings are produced as per drawing Standards.
2. Choose appropriate tools and materials	2.1 Working tools, equipment and materials are selected for the task.2.2 The work areas are tidied up as per organization policy.
3. Measure and mark out dimensions on workpieces	 3.1 <i>Measuring tools</i> suitable for the work are selected 3.2 Measuring tools are inspected and calibrated if required 3.3 Dimensions are marked on the workpiece as per the working drawing.
4. Use hand tools to cut and file parts	 4.1 <i>Hand tools</i> are selected based on operation plan 4.2 Workpiece is cut to specification 4.3 Workpiece is filed to specification 4.4 Part are produced to <i>specifications</i>
5. Use drills to make holes	 5.1 Hole centers are marked and center-punched as per operation plan. 5.2 Drill bits are selected and mounted 5.3 Workpiece is mounted and clamped 5.4 Hole is drilled to specification 5.5 Holes inspected to <i>specification</i>
6. Thread using taps and dies	6.1 Taps and dies selected based on operation plan.6.2 Taps and dies are set up on the work piece

ELEMENT These describe the key outcomes which make up workplace function	PERFORMANCE CRITERIA These are assessable statements which specify the required level of performance for each of the elements. Bold and italicized terms are elaborated in the Range
	6.3 Threads are cut to specification
7. Assemble metal parts and sub-	7.1 Parts <i>joined</i> , fitted and assembled
assemblies	7.2 Final assembly inspected as per specification
8. Polish finished work	8.1 <i>Polishing</i> material are selected
	8.2 Finished work is cleaned
	8.3 Finished work is polished to specification
9. Perform housekeeping	9.1 Waste is segregated and disposed as per disposal guidelines.
	9.2 Housekeeping is carried out as per workplace requirement
10. Inspect finished work for accuracy and quality	10.1 Inspection tools and methods selected as per operation plan
	10.2 Finished work is inspected as per specification
	10.3 Adjustments are made based on inspections results
11. Maintenance of tools and	11.1 Machines and tools are lubricated
equipment	11.2 Tools are ground to specification
	11.3 Faults on tools are identified and reported
	11.4 Store tools and equipment

RANGE

This section provides work environments and conditions to which the performance criteria apply. It allows for different work environments and situations that will affect performance.

VARIABLE	RANGE
1. Measuring tools may	Steel rule
include but not limited to:	Vernier calliper
	Micrometre screw gauge
	Vernier height gauge
	Combination set
	• Bevels
2. Drawing Standards may	• ISO
include but not limited to:	• BS
	• ANSI
3. Operation Plan may	Sequence of operations
include but not limited to:	Measuring tools
	Hand tools
	Cutting tools

VARIABLE	RANGE
	Inspection tools
4. Marking out tools may include but not limited to:	 Scribers Dividers Dot punch Centre punch Engineers square Straight edge Surface plate
5. Work holding devices may include but not limited to:	 Bench vice V-Block Angle plate G-clamp Jigs and fixtures Hand vice
6. Hand tools may include but not limited to:	 Files Saws Hammers Chisels Taps and dies
7. Machine tools may include but not limited to:	 Drilling machines Grinding machine
8. Threads may include but not limited to:	Internal and external threadsV-profile threads
9. Polishing may include but not limited to:	Emery clothPolishing and burnishing machineFiling
10. Hole drilled may include but not limited to:	 Location Counter sinking Counter boring Reaming Boring
11. Joined may include but not limited to:	 Riveting Fastening Soldering Brazing Welding
12. Specifications may include but not limited to:	 Dimensions Tolerances Geometry Surface finish

VARIABLE	RANGE
	Functionality

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit of competency.

Required Skills

The individual needs to demonstrate the following skills:

- Technical drawing
- Using measuring and inspection tools
- Using hand tools
- Using portable and bench drilling machines
- Soldering and brazing
- Riveting and fastening
- Basic use of the lathe machine
- Using grinding machine

Required Knowledge

The individual needs to demonstrate knowledge and understanding of:

- Occupational Health and Safety Act of Kenya laws 2007 with focus on personal safety, machine safety and workplace
- National Environment Management Authority Act, Kenya 2004
- OSH act
- Equipment manuals
- · Basic technical drawing complying to ISO, ANSI & BS standards
- ISO 1101 Geometrical tolerance and where to use the norm
- Work Planning and documentation
- Measuring tools
- Hand tools
- Bench work
- Portable and bench drilling machines
- Lathe machine
- Grinding machine
- Inspection and quality control
- Preventive maintenance of machine tools
- Metal cutting technology
- Materials and metallurgy
- WIBA act (2007)
- Report writing

EVIDENCE GUIDE

This provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge and range.

1.	Critical Aspects	Assessment requires evidence that the learner:
	of Competency	1.1 Observed rules and procedures in the workshop
		1.2 Interpreted technical drawing
		1.3 Produced operation plan
		1.4 Produced holes on a work piece
		1.5 Threaded using taps and dies
		1.6 Assembled metal parts
		1.7 Polished finished work
		1.8 Maintained tools and equipment
		1.9 Did housekeeping before, during and after operations
2.	Resource	2.1 Hand measuring tools
	Implications	2.2 Hand marking tools
		2.3 Hand tools
		2.4 Inspection tools and equipment
		2.5 Hand drilling machine
		2.6 Bench Drilling machine
		2.7 Grinding machine
		2.8 Work benches
3.	Methods of	Competency may be assessed through:
	Assessment	3.1 Observation
		3.2 Oral presentations
		3.3 Written Tests
4	Context of	Competency may be assessed individually in the actual workplace
	Assessment	or through accredited institution or during Industrial Attachment
5	Guidance	Holistic assessment with other units relevant to the industry sector,
	information for	workplace and job role is recommended.
	assessment	workplace and job fole is recommended.
	assessment
