## **APPLY BASIC MATHEMATICS**

## UNIT CODE: CON/OS/BUT/BC/CU/01/5/A

## **UNIT DESCRIPTION:**

This unit describes the competencies required in applying algebra, trigonometry, statistics, indices logarithms and ratio. It also involves performing geometrical calculations, business calculations, carrying out mensuration and plotting simple graphs.

ELEMENT	PERFORMANCE CRITERIA
These describe the key outcomes	These are assessable statements which specify
which make up workplace function	the required level of performance for each of
	the elements ( <b>Bold and italicized terms are</b>
	elaborated in the Range)
1 Apply algebra	1.1 Calculations involving Indices are
	nerformed based on the concent
	1.2 Linear equations are represented based on
	the concept
	1.2 Scientific colculator is used in colving
	methamotical problems in line with
	manifesturer's menual
	1.4 Simultaneous equations are performed
	has a mothematical rules
2	1.5 Simple algebraic equations are formed
Ø*	1.5 Simple algebraic equations are formed
	based on the concept
	1.6 Simple algebraic equations are solved based
	on the concept
2. Apply trigonometry	2.1 Ingonometric ratios are derived based on
	trigonometric rules.
	2.2 Calculations are performed based on
	trigonometric rules
3. Perform geometrical	3.1 Areas of regular figures are calculated based
calculations	on the given formulae
	3.2 Areas of irregular figures are calculated
	based on concept
	3.3 Apply Pythagoras' theorem based on the
	concept
4. Carry out basic mensuration	A 1 Various units of measurements are
	identified based on the course requirements
	4.2 Units are converted based on best practices
	4.2 Units are converted based on best practices

## ELEMENTS AND PERFORMANCE CRITERIA

<b>ELEMENT</b> These describe the key outcomes which make up workplace function.	<b>PERFORMANCE CRITERIA</b> These are assessable statements which specify the required level of performance for each of the elements. ( <i>Bold and italicized terms are</i> <i>elaborated in the Range</i> )
	<ul> <li>4.3 Perimeter and areas of regular <i>figures</i> are obtained based on known formulae</li> <li>4.4 Area of irregular figures are obtained based on best practice</li> <li>4.5 Volume and Surface area of solids are obtained based on given formulae</li> </ul>
5. Apply statistics	<ul> <li>5.1 Grouped and ungrouped data is identified and interpreted based on given sample</li> <li>5.2 Ungrouped data is organized based on the concept</li> <li>5.3 Data is represented in frequency tables based on the concept</li> <li>5.4 The median, mode and mean of grouped and ungrouped data is calculated based on the concept</li> <li>5.5 Data is presented in a chart form based on the concept</li> </ul>
6. Plot simple graphs	<ul><li>6.1 A <i>graph</i> is plotted for given set of data based on data</li><li>6.2 Information from a given graph is interpreted based on data</li></ul>
7. Apply Indices and Logarithms	<ul> <li>7.1 Converted numbers from one base to another</li> <li>7.2 Applied the laws of indices in solving exponential equations</li> <li>7.3 Applied the laws of logarithms in solving logarithmic equations</li> </ul>
8. Apply Ratios	<ul> <li>9.1 Differentiated between rational and irrational numbers</li> <li>9.2 Expressed ratios as percentages</li> <li>9.3 Solved problems involving direct and inverse proportions</li> </ul>

# RANGE

This section provides work environments and conditions to which the performance criteria apply. It allows for different work environments and situations that will affect performance.

Variable	Range
1. Units of measurement may include but not limited to:	<ul> <li>Millimetres</li> <li>Centimetres</li> <li>Metres</li> <li>Kilometres</li> </ul>
2. Figures may include but not limited to:	<ul> <li>square</li> <li>rectangle</li> <li>triangle</li> <li>polygons</li> <li>circles</li> </ul>
<ol> <li>Graph may include but not limited to:</li> </ol>	<ul> <li>linear graphs</li> <li>bar graphs</li> <li>pie chart</li> <li>pictograph</li> </ul>

## **REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit of competency.

## **Required Skills**

The individual needs to demonstrate the following skills:

- Logical thinking
- Problem solving
- interpersonal
- Drawing
- sketching
- measuring skills

## **Required knowledge**

The individual needs to demonstrate knowledge of:

- Fundamental operations (addition, subtraction, division, multiplication)
- Calculating area and volume
- Types and purpose of measuring instruments
- Units of measurement and abbreviations
- Rounding techniques
- Types of fractions
- Types of angles

• Types of tables and graphs

# Presentation EVIDENCE GUIDE

This provides advice on assessment and must be read in conjunction with the performance criteria, required skills, knowledge and range.

1. Critical aspects of	Assessment requires evidence that the candidate:
Competency	1.1 Demonstrated ability to apply basic trigonometry based on
	trigonometric rules.
	1.2 Carried out mensuration as per formulae.
	1.3 Applied algebra as per algebraic concepts.
	1.4 Performed geometrical calculations based on concepts.
	1.5 Demonstrated knowledge of applied statistics in accordance with
	statistical concepts.
	1.6 Plotted simple graphs as per provided data.
2. Resource	The following resources should be provided:
Implications	2.1 Access to relevant or appropriately simulated environment where
	assessment can take place
	2.2 Measuring equipment
	2.3 Materials relevant to the proposed activity or tasks
3. Methods of	Competency in this unit may be assessed through:
Assessment	3.1 Written tests
	3.2 Practical Tests
	3.3 Oral Questioning
4. Context of	Competency may be assessed:
Assessment	4.1 On-the-job
	4.2 In a simulated workplace setting
5. Guidance	Holistic assessment with other units relevant to the industry sector,
information for	workplace and job role is recommended.
assessment
