#### **FOREWORD**

The provision of quality education and training is fundamental to the Government's overall strategy for social economic development. Quality education and training will contribute to achievement of Kenya's development blue print and sustainable development goals.

Reforms in the education sector are necessary for the achievement of Kenya Vision 2030 and meeting the provisions of the Constitution of Kenya 2010. The education sector had to be aligned in the Constitution and this resulted to the formulation of the Policy Framework for Reforming Education and Training (Sessional Paper No. 4 of 2016). A key feature of this policy is the radical change in the design and delivery of the TVET training. This policy document requires that training in TVET be competency based, curriculum development be industry led, certification be based on demonstration of competence and mode of delivery allows for multiple entry and exit in TVET programmes.

These reforms demand that Industry takes a leading role in curriculum development to ensure the curriculum addresses its competence needs. It is against this background that these Occupational Standards was developed for the purpose of developing a competency-based curriculum for a Cyber Security operation Level 5. These Occupational Standards will also be the basis for assessment of an individual for competence certification.

It is my conviction that these Occupational Standards will play a great role towards development of competent human resource for the Security Sector's growth and sustainable development.

PRINCIPAL SECRETARY, VOCATIONAL AND TECHNICAL TRAINING MINISTRY OF EDUCATION

#### **PREFACE**

Kenya Vision 2030 aims to transform the country into a newly industrializing, "middle-income country providing a high quality life to all its citizens by the year 2030". Kenya intends to create a globally competitive and adaptive human resource base to meet the requirements of a rapidly industrializing economy through life-long education and training. TVET has a responsibility of facilitating the process of inculcating knowledge, skills and attitudes necessary for catapulting the nation to a globally competitive country, hence the paradigm shift to embrace Competency Based Education and Training (CBET).

The Technical and Vocational Education and Training Act No. 29 of 2013 and the Sessional Paper No. 4 of 2012 on Reforming Education and Training in Kenya, emphasized the need to reform curriculum development, assessment and certification. This called for shift to CBET to address the mismatch between skills acquired through training and skills needed by industry as well as increase the global competitiveness of Kenyan labour force.

The TVET Curriculum Development, Assessment and Certification Council (TVET CDACC), in conjunction with Security Sector Skills Advisory Committee (SSAC) have developed these Occupational Standards for a Cyber Security Operator. These standards will be the basis for development of a competency-based curriculum for cyber Security Level 5. These Standards will also be the basis for assessment of an individual for competence certification.

The occupational standards are designed and organized with clear performance criteria for each element of a unit of competency. These standards also outline the required knowledge and skills as well as evidence guide.

I am grateful to the Council Members, Council Secretariat, Security SSAC, expert workers and all those who participated in the development of these occupational standards.

CHAIRPERSON, TVET CDACC

#### **ACKNOWLEDGMENT**

These Occupational Standards were developed through combined effort of various stakeholders from private and public organizations. I am sincerely thankful to the management of these organizations for allowing their staff to participate in this course. I wish to acknowledge the invaluable contribution of industry players who provided inputs towards the development of these Standards.

I thank TVET Curriculum Development, Assessment and Certification Council (TVET CDACC) for providing guidance on the development of these Standards. My gratitude goes to the Security Sector Skills Advisory Committee (SSAC) members for their contribution to the development of these Standards. I thank all the individuals and organizations who participated in the validation of these Standards.

I acknowledge all other institutions which in one way or another contributed to the development of these Standards.

CHAIRPERSON
SECURITY SECTOR SKILLS ADVISORY COMMITTEE

## **KEY TO UNIT CODE**

#### **OVERVIEW**

Cyber Security Level 5 qualification consists of competencies that a person must achieve to enable him/her to be certified as a Cyber Security operator.

A Cyber security technician is a person who will carry out Cyber security duties using a given design and customer's requirements. This work demands the technician to perform Computer repair and maintenance, demonstrate understanding of security laws, policies and regulations, perform Computer Networking, secure Software application and databases, install Cyber security system and conduct security Assessment and testing.

The units of competency comprising Cyber Security level 5 qualifications include the following basic, common and core competencies:

### **BASIC COMPETENCY**

Unit Code	Unit Title
SES/OS/CS/BC/01/5/A	Demonstrate communication skills
SEC/OS/CS/BC/02/5/A	Demonstrate Numeracy skills
SEC/OS/CS/BC/03/5/A	Demonstrate entrepreneurial skills
SEC/OS/CS/BC/04/5/A	Demonstrate employability skills
SEC/OS/CS/BC/05/5/A	Demonstrate environmental literacy
SEC/OS/CS/BC/06/5/A	Demonstrate occupational safety and health practices

## **COMMON COMPETENCY**

Unit Code	Unit Title
SEC/OS/CS/CC/01/5/A	Demonstrate Digital Literacy

## **CORE COMPETENCY**

Unit Code	Unit Title
SEC/OS/CS/CR/01/5/A	Perform Computer repair and maintenance
SEC/OS/CS/CR/02/5/A	Demonstrate understanding of security laws, policies and regulations
SEC/OS/CS/CR/03/5/A	Perform Computer Networking
SEC/OS/CS/CR/04/5/A	Secure Software application
SEC/OS/CS/CR/05/5/A	Secure Databases
SEC/OS/CS/CR/06/5/A	Install Cyber security system
SEC/OS/CS/CR/07/5/A	Conduct security Assessment and testing

### **DEMONSTRATE COMMUNICATION SKILLS**

UNIT CODE: SES/OS/CS/BC/01/5/A

## **UNIT DESCRIPTION**

This unit covers the competencies required to demonstrate communication skills. It involves meeting communication needs of clients and colleagues, contributing to the development of communication strategies, conducting workplace interviews, facilitating group discussions and representing the organisation

## ELEMENTS AND PERFORMANCE CRITERIA

ELEMENT	PERFORMANCE CRITERIA		
These describe the key outcomes which make up workplace function	These are assessable statements which specify the required level of performance for each of the elements.  Bold and italicized terms are elaborated in the Range		
1. Meet communicatio n needs of clients and colleagues	<ul> <li>1.1 Specific communication needs of clients and colleagues are identified and met based on workplace requirements</li> <li>1.2 Different communication approaches are identified and applied according to clients' needs</li> <li>1.3 Conflict is identified and addressed as per the standards of the organization</li> </ul>		
2. Contribute to the development of communicatio n strategies	<ul> <li>2.1 Strategies for internal and external dissemination of information are developed, promoted, implemented and reviewed as per organizations' strategic plan</li> <li>2.2 Channels of communication are established and reviewed based on the workplace needs</li> <li>2.3 Communication training needs are identified and provided according to SOPs</li> <li>2.4 Work related network and relationship are maintained based on workplace requirements</li> <li>2.5 Negotiation and conflict resolution strategies are maintained as per the workplace procedures</li> </ul>		
3. Conduct workplace interviews	3.1 <i>Communication strategies</i> are identified and employed in <i>interview situations</i> based on workplace requirements 3.2 Records of interviews are made and maintained in accordance with organizational procedures 3.3 Effective questioning, listening and nonverbal communication techniques are used based on needs		
4. Facilitate group	4.1 Mechanisms to enhance <i>effective group interaction</i> are identified and implemented according to		

discussions	workplace requirements
	4.2 Strategies to encourage group participation are
	identified and used as per organizations' procedures
	4.3 Meetings objectives and agenda are set and followed
	based on workplace requirements
	4.4 Relevant information is provided and feedback
	obtained according to set protocols
	4.5 Evaluation of group communication strategies is
	undertaken in accordance with workplace guidelines
	4.6 Specific communication needs of individuals are
	identified and addressed as per individual needs
5. Represent the	5.1 Relevant presentation are researched and presented
organization	based on internal or external communication forums
	requirements Presentation is delivered in a clear and
	sequential manner as per the predetermined time
	5.2 Presentation is made as per appropriate media
	5.3 Difference views are respected based on workplace
	procedures
	5.4 Written communication is done as per
	organizational standards
	5.5 Inquiries are responded according to organizational
	standard

## **RANGE**

This section provides work environment and conditions to which the performance criteria apply. It allows for different work environment and situations that will affect performance.

Variable	Range
Communication     strategies may     include but not     limited to:	<ul> <li>Language switch</li> <li>Comprehension check</li> <li>Repetition</li> <li>Asking confirmation</li> <li>Paraphrase</li> <li>Clarification request</li> <li>Translation</li> <li>Restructuring</li> <li>Approximation</li> <li>Generalization</li> </ul>
2. Effective group interaction may include but not limited to:	<ul> <li>Identifying and evaluating what is occurring within an interaction in a non-judgmental way</li> <li>Using active listening</li> <li>Making decision about appropriate words, behavior</li> <li>Putting together response which is culturally</li> </ul>

	appropriate
	Expressing an individual perspective
	Expressing own philosophy, ideology and
	background and exploring impact with
	relevance to communication
	Openness and flexibility in communication
3. Interview situations	Establishing rapport
may include but not	Eliciting facts and information
limited to:	Facilitating resolution of issues
	Developing action plans
	Diffusing potentially difficult situations

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit of competency.

### **Required Skills**

The individual needs to demonstrate the following skills:

- Active listening
- Giving/receiving feedback
- Interpretation of information
- Role boundaries setting
- Negotiation
- Communication

## Required Knowledge

The individual needs to demonstrate knowledge of:

- Communication process
- Dynamics of groups and different styles of group leadership
- Communication skills relevant to client groups
- Flexibility in communication

## **EVIDENCE GUIDE**

This provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge and range.

1. Critical	Assessment requires evidence that the candidate:
aspects of	1.1 Met communication needs of clients and colleagues
Competency	1.2 Contributed to the development of communication
	strategies
	1.3 Conducted interviews

### **DEMONSTRATE NUMERACY SKILLS**

UNIT CODE: SES/OS/CS/BC/02/5/A

#### UNIT DESCRIPTION

This unit covers the competencies required to demonstrate numeracy skills. it involves calculating with whole numbers and familiar fractions, decimals, and percentages for work estimating, measuring, and calculating with routine metric measurements for work, using routine maps and plans for work, interpreting, drawing and constructing 2D and 3D shapes for work, interpreting routine tables, graphs and charts for work, collecting data and constructing routine tables and graphs for work and using basic functions of calculator.

## ELEMENTS AND PERFORMANCE CRITERIA

ELEMENT	PERFORMANCE CRITERIA		
These describe the key	These are assessable statements which specify the required		
outcomes which make	level of performance for each of the elements.		
up workplace function.	Bold and italicized terms are elaborated in the Range.		
1. Calculate with whole	1.1 Mathematical information that may be partly		
numbers and familiar	embedded in routine workplace tasks and texts is		
fractions, decimals and	selected and interpreted as per SOPs		
percentages for work	1.2 Whole numbers and routine or familiar fractions,		
	decimals and percentages including familiar rates		
	are interpreted and comprehended as per SOPs		
	1.3 Calculations which may involve a number of steps		
	are performed as per SOPs		
	1.4 Calculations done with whole numbers and routine		
	or familiar fractions, decimals and percentages as per SOPs		
	1.5 Conversion between equivalent forms of fractions,		
	decimals and percentages is done as per SOPs		
	1.6 Order of operations is applied to solve multi-step calculations as per SOPs		
	1.7 Problem solving strategies are appropriately applied as per SOPs		
	1.8 Estimations are made to check reasonableness of		
	problem solving process, outcome and its		
	appropriateness to the context and task as per SOPs		
	1.9 Formal and informal mathematical language and		
	symbolism are used to communicate the result of		
	the task as per SOPs.		
2. Estimate, measure,	2.1 Measurement information in workplace tasks and		
and calculate with	texts are selected and interpreted in accordance with		
routine metric	workplace requirements		
	2.2 Appropriate routine measuring equipment are		

measurements for work		identified and selected in accordance with
		workplace requirements
	2.3	Measurements are estimated and made using correct
		units as per measurement manuals.
	2.4	Estimations and calculations done as per routine
		measurements
	2.5	Conversions performed routinely as per metric
		units
	2.6	Problem solving processes are used to undertake the tasks as per workplace procedures.
	2.7	Estimations are made to check reasonableness of
	2.7	problem solving process, outcome and its
		appropriateness to the context and task as per
		workplace procedures
	2.8	Information is recorded using mathematical
		language and symbols appropriate to discuss the
		task as per workplace procedures.
3. Use routine	3.1	Features are identified in routine maps and plans as
maps and plans for work		per SOPs
	3.2	Symbols and keys in routine maps and plans are
		clearly explained as per SOPs
	3.3	Orientation of map to North is identified and
		interpreted as per SOPs
	3.4	Understanding of direction and location is clearly
		demonstrated as per SOPs
	3.5	Simple scale is applied to estimate length of
		objects, or distance to location or object as per
	2.6	SOPs
	3.6	Directions are given and received using both formal
1 Intermed duory	4 1	and informal language as per SOPs
4. Interpret, draw	4.1	Two dimensional shapes and routine three
and construct 2D and		dimensional shapes identified in everyday objects and in different orientations in accordance with job
3D shapes for work		specifications
	4.2	The use and application of shapes elaborately
	7.2	explained as per SOPs
	4.3	Formal and informal mathematical language and
		symbols used to describe and compare the features
		of two dimensional shapes and routine three
		dimensional shapes as per workplace procedures.
	4.4	Common angles identified in accordance with SOPs
	4.5	Common angles in everyday objects are
		appropriately estimated as per SOPs
	4.6	Formal and informal mathematical language are
		used to describe and compare common angles as
		per workplace procedures.
	4.7	Common geometric instruments used to draw two
		dimensional shapes as per SOPs
	4.8	Routine three dimensional objects constructed from

		given nets as per SOPs.
5. Interpret routine	5.1	Routine tables, graphs and charts identified in
tables, graphs and charts		predominately familiar texts and contexts as per
for work		tables and graph manuals
	5.2	Common types of graphs and their different uses
		identified as per SOPs
	5.3	Features of tables, graphs and charts identified as
		per workplace procedures
	5.4	Information in routine tables, graphs and charts
		located and interpreted as per workplace procedures
	5.5	Calculations are perform to interpret information as
		per SOPs
	5.6	How statistics can inform and persuade
		interpretations is explained as per SOPs
	5.7	Misleading statistical information is identified as
		per workplace procedures.
	5.8	Information relevant to the workplace is discussed
		as per workplace procedures.
6. Collect data and	6.1	Features of common tables and graphs identified as
construct routine tables		per SOPs
and graphs for work	6.2	Uses of <i>different tables and graphs</i> identified as
	<i>(</i> 2	per job specifications
	6.3	Data and variables to be collected are determined as
	6.1	per workplace procedures.
	6.4	The audience is determined as per the workplace
	6.5	procedures  Method of data collection is select as non ich
	6.5	Method of data collection is select as per job requirement
	6.6	Data is collected as per SOPs
	6.7	Information is collated in a table as per SOPs
	6.8	Suitable scale and axes determined as per job
	0.0	specifications
	6.9	Graph to present information is drafted and drawn
	0.7	as per SOPs
	6.10	Data checked to ensure that it meets the expected
		results and context as per workplace procedures
	6.11	Information is reported or discussed using formal
		and informal mathematical language as per
		workplace procedures
7. Use basic	7.1	Keys are identified and used for <i>basic functions on</i>
functions of calculator		a calculator as per SOPs
	7.2	Calculation is done using whole numbers, money
		and routine decimals and percentages as per SOPs
	7.3	Calculation done with routine fractions and
		percentages as per SOPs
	7.4	Order of operations is applied to solve multi-step
		calculations as per SOPs
	7.5	Results are interpreted, displayed and recorded as
		per workplace procedures

7.6	Estimations are made to check reasonableness of
	problem solving process, outcome and its
	appropriateness to the context and task as per
	workplace procedures
7.7	Formal and informal mathematical language and
	appropriate symbolism and conventions used to
	communicate the result of the task as per workplace
	procedures.

## **RANGE**

This section provides work environments and conditions to which the performance criteria apply. It allows for different work environments and situations that will affect performance.

Variable	Range	
Use basic     functions of     calculator may     include but not     limited to:	<ul> <li>Addition</li> <li>Multiplication</li> <li>Calculate ratios</li> <li>Conversion of ratios into percentages</li> </ul>	
2. Different tables and graphs may include but not limited to:	<ul> <li>Bar Graphs</li> <li>Flow Charts</li> <li>Pie Charts</li> <li>Pictograph</li> <li>Line Graphs</li> <li>Time Series Graphs</li> <li>Stem and Leaf Plot</li> <li>Histogram</li> <li>Dot Plot</li> <li>Scatter plot</li> </ul>	

# REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit of competency.

## **Required Skills**

The individual needs to demonstrate the following skills:

- Measuring
- Logical thinking
- Computing
- Drawing of graphs

- Applying mathematical formulas
- Analytical

## Required knowledge

The individual needs to demonstrate knowledge of:

- Types of common shapes
- Differentiation between two dimensional shapes / objects
- Formulae for calculating area and volume
- Types and purpose of measuring instruments
- Units of measurement and abbreviations
- Fundamental operations (addition, subtraction, division, multiplication)
- Rounding techniques
- Types of fractions
- Different types of tables and graphs
- Meaning of graphs, such as increasing, decreasing, and constant value
- Preparation of basic data, tables & graphs

### **EVIDENCE GUIDE**

This provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge and range.

1. Critical aspects	Assessment requires evidence that the candidate:
of Competency	1.1 Calculated correctly with whole numbers and
	routine or familiar fractions, decimals and
	percentages
	1.2 Estimated, measured and calculated with routine metric measurements
	1.3 Applied simple scale to estimate length of objects or
	distance to location or object
	1.4 Used formal and informal mathematical language to
	describe and compare common angles
	1.5 Used common geometric instruments to draw two
	dimensional shapes
	1.6 Collected data and constructed routine tables and
	graphs
	1.7 Used basic functions of calculator correctly
2. Resource	The following resources should be provided:
Implications	2.1 Access to relevant workplace or appropriately
	simulated environment where assessment can take
	place
	2.2 Materials relevant to the proposed activity or tasks
3. Methods of	Competency may be assessed through:
Assessment	3.1 Observation

		3.2	Oral questioning
		3.3	Written test
		3.4	Portfolio of Evidence
		3.5	Interview
		3.6	Third party report
4.	Context of	Comp	petency may be assessed in:
	Assessment	4.1	On the job
		4.2	Off the job
		4.3	Industrial attachment
5.	Guidance	Holis	tic assessment with other units relevant to the
	information for	indus	try sector, workplace and job role is recommended.

	procedures
	6.4 Slides and handouts are printed according to work
	requirements

## **RANGE**

This section provides work environments and conditions to which the performance criteria apply. It allows for different work environments and situations that will affect performance.

Variable	Range
Appropriate computer     hardware may include     but not limited to:	<ul> <li>Computer case</li> <li>Monitor</li> <li>keyboard</li> <li>mouse</li> </ul>

2. Data security and privacy may include but not limited to:	<ul> <li>Confidentiality of data</li> <li>Cloud computing</li> <li>Integrity -but-curious data surfing</li> </ul>
3. Security and control measures may include but not limited to:	<ul> <li>Counter measures against cyber terrorism</li> <li>Risk reduction</li> <li>Cyber threat issues</li> <li>Risk management</li> <li>Pass wording</li> </ul>
4. Security threats may include but not limited to:	<ul><li>Cyber terrorism</li><li>Hacking</li></ul>

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit of competency.

### **Required Skills**

The individual needs to demonstrate the following skills:

- Analytical skills
- Interpretation
- Typing
- Communication
- Basic ICT skills

## Required Knowledge

The individual needs to demonstrate knowledge of:

- Software concept
- Functions of computer software and hardware
- Data security and privacy
- Computer security threats and control measures
- Technology underlying cyber-attacks and networks
- Cyber terrorism
- Computer crimes
- Detection and protection of computer crimes
- Laws governing protection of ICT
- Microsoft suite

#### **EVIDENCE GUIDE**

This provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge and range.

1. Critical	Assessment requires evidence that the candidate:
-------------	--

Aspects		1.1 Identified and controlled security threats
Compet	ency	1.2 Detected and protected computer crimes
		1.3 Applied word processing in office tasks
		1.4 Designed, prepared work sheet and applied data to the
		cells in accordance to workplace procedures
		1.5 Opened electronic mail for office communication as per
		workplace procedure
		1.6 Installed internet and World Wide Web for office tasks
		in accordance with office procedures
		1.7 Integrated emerging issues in computer ICT
		applications
		1.8 Applied laws governing protection of ICT
2. Resource	e	The following resources should be provided:
Implicat	tions	2.1 Tablets

### DEMONSTRATE ENTREPRENEURIAL SKILLS

**UNIT CODE:** SES/OS/CS/BC/04/5/A

### **UNIT DESCRIPTION**

This unit covers the competencies required to demonstrate understanding of entrepreneurship. It involves demonstrating understanding of an entrepreneur, entrepreneurship, and self-employment, identifying entrepreneurship opportunities, creating entrepreneurial awareness, applying entrepreneurial motivation, developing business innovative strategies and developing business plan.

## ELEMENTS AND PERFORMANCE CRITERIA

ELEMENT	PERFORMANCE CRITERIA
Demonstrate     understanding of an     Entrepreneur	<ul> <li>1.1 Entrepreneurs and Businesspersons are distinguished as per principles of entrepreneurship</li> <li>1.2 Types of entrepreneurs are identified as per principles of entrepreneurship</li> <li>1.3 Ways of becoming an Entrepreneur are identified as per principles of Entrepreneurship</li> <li>1.4 Characteristics of Entrepreneurs are identified as per principles of Entrepreneurship</li> <li>1.5 Factors affecting Entrepreneurship development are explored as per principles of Entrepreneurship</li> </ul>
2. Demonstrate understanding of Entrepreneurship and self-employment	<ul> <li>2.1 Entrepreneurship and self-employment are distinguished as per principles of entrepreneurship</li> <li>2.2 Importance of self-employment is analysed based on business procedures and strategies</li> <li>2.3 Requirements for entry into self-employment are identified according to business procedures and strategies</li> <li>2.4 Role of an Entrepreneur in business is determined according to business procedures and strategies</li> <li>2.5 Contributions of Entrepreneurs to National development are identified as per business procedures and strategies</li> <li>2.6 Entrepreneurship culture in Kenya is explored as per business procedures and strategies</li> <li>2.7 Born or made Entrepreneurs are distinguished as per entrepreneurial traits</li> </ul>
3. Identify Entrepreneurship opportunities	3.1 Sources of business ideas are identified as per business procedures and strategies 3.2 Business ideas and opportunities are

	generated as per business procedures and
	strategies
	3.3 Business life cycle is analysed as per
	business procedures and strategies
	3.4 Legal aspects of business are identified as
	per procedures and strategies
	3.5 Product demand is assessed as per market
	strategies
	3.6 Types of <i>business environment</i> are
	identified and evaluated as per business
	procedures
	3.7 Factors to consider when evaluating business
	environment are explored based on business
	procedure and strategies
	3.8 Technology in business is incorporated as
	per best practice
4. Create entrepreneurial	4.1 <i>Forms of businesses</i> are explored as per
awareness	business procedures and strategies
	4.2 Sources of business finance are identified as
	per business procedures and strategies
	4.3 Factors in selecting source of business
	finance are identified as per business
	procedures and strategies
	4.4 Governing policies on Small Scale
	Enterprises (SSEs) are determined as per
	business procedures and strategies
	4.5 Problems of starting and operating SSEs are
	explored as per business procedures and
	strategies
5. Apply entrepreneurial	5.1 Internal and external motivation factors are
motivation	determined in accordance with motivational
	theories
	5.2 Self-assessment is carried out as per
	entrepreneurial orientation
	5.3 Effective communications are carried out in
	accordance with communication principles
	5.4 Entrepreneurial motivation is applied as per
6 Dayalan innovativa	motivational theories
6. Develop innovative	6.1 Business innovation strategies are determined in accordance with the
business strategies	organization strategies
	6.2 Creativity in business development is
	demonstrated in accordance with business
	strategies 6.3 <i>Innovative business strategies</i> are developed
	as per business principles
	6.4 Linkages with other entrepreneurs are
	created as per best practice
	6.5 ICT is incorporated in business growth and
	development as per best practice
7. Develop Business Plan	7.1 Identified Business is described as per
7. Develop Business I lan	business procedures and strategies
	ousiness procedures and strategies

7.2 Marketing plan is developed as per business
plan format
7.3 Organizational/Management plan is prepared
in accordance with business plan format
7.4 Production/operation plan in accordance
with business plan format
7.5 Financial plan is prepared in accordance with
the business plan format
7.6 Executive summary is prepared in
accordance with business plan format
7.7 Business plan is presented as per best
practice

## **RANGE**

This section provides work environment and conditions to which the performance criteria apply. It allows for different work environment and situations that will affect performance.

1.	Variable	Range
2.	<b>J</b> 1 1	• Innovators
	include but not limited to:	<ul> <li>Imitators</li> </ul>
		<ul> <li>Craft</li> </ul>

	<ul> <li>New markets</li> </ul>
	<ul> <li>New sources of supplies</li> </ul>
	<ul> <li>Change in industrialization</li> </ul>

# REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit of competency.

## **Required Skills**

The individual needs to demonstrate the following skills:

- Analytical
- Management
- Problem-solving
- Root-cause analysis
- Communication

## **Required Knowledge**

The individual needs to demonstrate knowledge of:

- Decision making
- Business communication
- Change management
- Competition
- Risk
- Net working
- Time management

- Leadership
- Factors affecting entrepreneurship development
- Principles of Entrepreneurship
- Features and benefits of common operational practices, e. g., continuous improvement (kaizen), waste elimination,
- Conflict resolution
- Health, safety and environment (HSE) principles and requirements
- Customer care strategies
- Basic financial management
- Business strategic planning
- Impact of change on individuals, groups and industries
- Government and regulatory processes
- Local and international market trends
- Product promotion strategies
- Market and feasibility studies
- Government and regulatory processes
- Local and international business environment
- Relevant developments in other industries
- Regional/ County business expansion strategies

### **EVIDENCE GUIDE**

This provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge and range.

1. Critical Aspects of	Assessment requires evidence that the candidate:
Competency	1.1 Distinguished entrepreneurs and business persons
	correctly
	1.2 Identified ways of becoming an entrepreneur
	appropriately
	1.3 Explored factors affecting entrepreneurship
	development appropriately
	1.4 Analysed importance of self-employment
	accurately
	1.5 Identified requirements for entry into self-
	employment correctly
	1.6 Identified sources of business ideas correctly
	1.7 Generated Business ideas and opportunities
	correctly
	1.8 Analysed business life cycle accurately
	1.9 Identified legal aspects of business correctly
	1.10 Assessed product demand accurately
	1.11 Determined Internal and external motivation
	factors appropriately
	1.12 Carried out communications effectively
	1.13 Identified sources of business finance correctly

		1.14 Determined Governing policy on small scale	
		enterprise appropriately	
		1.15 Explored problems of starting and operating	
		SSEs effectively	
		1.16 Developed Marketing,	
		Organizational/Management,	
		Production/Operation and Financial plans	
		correctly	
		1.17 Prepared executive summary correctly	
		1.18 Determined business innovative strategies	
		appropriately	
		1.19 Presented business plan effectively	
2.	Resource	The following resources should be provided:	
	Implications	2.1 Access to relevant workplace where assessmen	nt
		can take place	
		2.2 Appropriately simulated environment where	
		assessment can take place	
3.	Methods of	Competency may be assessed through:	
	Assessment	3.1 Written tests	
		3.2 Oral questions	
		3.3 Third party report	
		3.4 Interviews	
		3.5 Portfolio	
4.	Context of	Competency may be assessed:	
	Assessment	4.1 On-the-job	
		4.2 Off-the –job	
		4.3 During Industrial attachment	
5.	Guidance	Holistic assessment with other units relevant to the	
	information for	industry sector, workplace and job role is	
	assessment	recommended.	

### DEMONSTRATE EMPLOYABILITY SKILLS

UNIT CODE: SES/OS/CS/BC/05/5/A

## **Unit Description**

This unit covers competencies required to demonstrate employability skills. It involves conducting self-management, demonstrating interpersonal communication, critical safe work habits, leading small teams, planning and organizing work, maintaining professional growth and development, demonstrating workplace learning, problem solving skills and managing workplace ethics.

## ELEMENTS AND PERFORMANCE CRITERIA

ELEMENT	PERFORMANCE CRITERIA
These describe the key outcomes which make up workplace function.	These are assessable statements which specify the required level of performance for each of the elements.  Bold and italicized terms are elaborated in the Range
Conduct self-management	<ol> <li>1.1 Personal vision, mission and goals are formulated based on potential and in relation to organization objectives</li> <li>1.2 Emotional intelligence is demonstrated as per workplace requirements.</li> <li>1.3 Individual performance is evaluated and monitored according to the agreed targets.</li> <li>1.4 Assertiveness is developed and maintained based on the requirements of the job.</li> <li>1.5 Accountability and responsibility for own actions are demonstrated based on workplace instructions.</li> <li>1.6 Self-esteem and a positive self-image are developed and maintained based on values.</li> <li>1.7 Time management, attendance and punctuality are observed as per the organization policy.</li> <li>1.8 Goals are managed as per the organization's objective</li> <li>1.9 Self-strengths and weaknesses are identified based on personal objectives</li> </ol>
2. Demonstrate interpersonal communication	<ul> <li>2.1 Writing skills are demonstrated as per communication policy</li> <li>2.2 Negotiation and persuasion skills are demonstrated as per communication policy</li> <li>2.3 Internal and external stakeholders' needs are identified and interpreted as per the communication policy</li> </ul>

	2.4 Communication networks are established based on
	workplace policy
	2.5 Information is shared as per communication policy
3. Demonstrate	3.1 Stress is managed in accordance with workplace
critical safe	policy.
work habits	3.2 Punctuality and time consciousness is demonstrated in
	line with workplace policy.
	3.3 Personal objectives are integrated with organization
	goals based on organization's strategic plan.
	3.4 <b>Resources</b> are utilized in accordance with workplace
	policy.
	3.5 Work priorities are set in accordance to workplace
	goals and objectives.
	3.6 Leisure time is recognized and utilized in line with
	personal objectives.
	3.7 <i>Drugs and substances of abuse</i> are identified and
	avoided based on workplace policy.
	3.8 HIV and AIDS prevention awareness is demonstrated
	in line with workplace policy.
	3.9 Safety consciousness is demonstrated in the
	workplace based on organization safety policy.
	3.10 <i>Emerging issues</i> are identified and dealt with in
	accordance with organization policy.
4. Lead small	4.1 Performance targets for the <i>team</i> are set based on
teams	organization's objectives
	4.2 Duties are assigned in accordance with the
	organization policy.
	4.3 <i>Forms of communication</i> in a team are established
	according to organization's policy.
	4.4 Team performance is evaluated based on set targets as
	per workplace policy. 4.5 Conflicts are resolved between team members in line
	with organization policy. 4.6 Gender related issues are identified and mainstreamed
	in accordance workplace policy.
	4.7 Human rights and fundamental freedoms are
	identified and respected as Constitution of Kenya
	2010.
	4.8 Healthy relationships are developed and maintained in
	line with workplace.
5. Plan and	5.1 Task requirements are identified as per the workplace
organize work	objectives
3-6	5.2 Task is interpreted in accordance with safety (OHS),
	environmental requirements and quality requirements
	5.3 Work activity is organized with other involved
	personnel as per the SOPs
	5.4 Resources are mobilized, allocated and utilized to
	meet project goals and deliverables.
	5.5 Work activities are monitored and evaluated in line
	The state of the monte of the

	with organization procedures.
	5.6 Job planning is documented in accordance with
	workplace requirements.
	5.7 Time is managed achieve workplace set goals and
	objectives.
6. Maintain	6.1 Personal training needs are identified and assessed in
professional	line with the requirements of the job.
growth and	6.2 <i>Training and career opportunities</i> are identified and
development	utilized based on job requirements.
development	6.3 Resources for training are mobilized and allocated
	based organizations and individual skills needs.
	6.4 Licensees and certifications relevant to job and career
	are obtained and renewed as per policy.
	6.5 Work priorities and personal commitments are
	balanced and managed based on requirements of the
	job and personal objectives.
	6.6 Recognitions are sought as proof of career
7 Domonstrate	advancement in line with professional requirements.
7. Demonstrate	7.1 Learning opportunities are sought and managed based
workplace	on job requirement and organization policy.
learning	7.2 Improvement in performance is demonstrated based
	on courses attended.
	7.3 Application of learning is demonstrated in both
	technical and non-technical aspects based on
	requirements of the job
	7.4 Time and effort is invested in learning new skills
	based on job requirements
	7.5 Initiative is taken to create more effective and
	efficient processes and procedures in line with
	workplace policy.
	7.6 New systems are developed and maintained in
	accordance with the requirements of the job.
	7.7 Awareness of personal role in workplace <i>innovation</i>
	is demonstrated based on requirements of the job.
8. Demonstrate	8.1 Creative, innovative and practical solutions are
problem solving	developed based on the problem
skills	8.2 Independence and initiative in identifying and solving
	problems is demonstrated based on requirements of
	the job.
	8.3 Team problems are solved as per the workplace
	guidelines
	8.4 Problem solving strategies are applied as per the
	workplace guidelines
	8.5 Problems are analyzed and assumptions tested as per
	the context of data and circumstances
9. Demonstrate	9.1 Policies and guidelines are observed as per the
workplace ethics	workplace requirements
	9.2 Self-worth and professionalism is exercised in line
	with personal goals and organizational policies
	with personal goals and organizational policies

9.3	Code of conduct is observed as per the workplace
	requirements
9.4	Integrity is demonstrated as per legal requirement

# **RANGE**

This section provides work environment and conditions to which the performance criteria apply. It allows for different work environment and situations that will affect performance.

Range	Variable
1. Drug and substance abuse may include but not limited to:	Commonly abused  Alcohol  Tobacco  Miraa  Over-the-counter drugs  Cocaine  Bhang  Glue
2. Feedback may include but not limited to:	<ul><li>Verbal</li><li>Written</li><li>Informal</li><li>Formal</li></ul>
3. Relationships may include but not limited to:	<ul> <li>Man/Woman</li> <li>Trainer/trainee</li> <li>Employee/employer</li> <li>Client/service provider</li> <li>Husband/wife</li> <li>Boy/girl</li> <li>Parent/child</li> <li>Sibling relationships</li> </ul>
4. Forms of communication may include but not limited to:	<ul> <li>Written</li> <li>Visual</li> <li>Verbal</li> <li>Non verbal</li> <li>Formal and informal</li> </ul>
5. Team may include but not limited to:	<ul> <li>Small work group</li> <li>Staff in a section/department</li> <li>Inter-agency group</li> </ul>
6. Personal growth may include but not limited to:	

7. Personal	Long term
objectives may	• Short term
include but not	Broad
limited to:	
	• Specific
8. Trainings and	Participation in training programs
career	• Technical
opportunities	• Supervisory
may include but	<ul> <li>Managerial</li> </ul>
not limited to	<ul> <li>Continuing Education</li> </ul>
	• Serving as Resource Persons in conferences and workshops
9. Resource may	• Human
include but not	<ul> <li>Financial</li> </ul>
limited to:	<ul> <li>Hardware</li> </ul>
	• Software
10. Innovation may	New ideas
include but not	Original ideas
limited to:	<ul> <li>Different ideas</li> </ul>
	<ul> <li>Methods/procedures</li> </ul>
	<ul> <li>Processes</li> </ul>
	<ul> <li>New tools</li> </ul>
11. Emerging issues	Terrorism
may include but	Social media
not limited to:	<ul> <li>National cohesion</li> </ul>
	<ul> <li>Open offices</li> </ul>
12. Range of media	Mentoring
for learning may	<ul> <li>peer support and networking</li> </ul>
include but not	IT and courses
limited to:	<b>6</b>

# REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit of competency.

# **Required Skills**

The individual needs to demonstrate the following skills:

- Communication
- Critical thinking
- Observation
- Organizing
- Negotiation
- Monitoring
- Evaluation
- Record keeping
- Problem solving
- Decision Making
- Resource utilization

#### • Resource mobilization

## Required Knowledge

The individual needs to demonstrate knowledge of:

- Work values and ethics
- Company policies
- Company operations, procedures and standards
- Occupational Health and safety procedures
- Fundamental rights at work
- Personal hygiene practices
- Workplace communication
- Concept of time
- Time management
- Decision making
- Types of resources
- Work planning
- Resources and allocating resources
- Organizing work
- Monitoring and evaluation
- Record keeping
- Workplace problems and how to deal with them
- Gender mainstreaming
- HIV and AIDS
- Drug and substance abuse
- Leadership
- Safe work habits
- Professional growth and development
- Technology in the workplace
- Emerging issues
- Social media
- Terrorism
- National cohesion

### **EVIDENCE GUIDE**

This provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge and range.

1. Critical	Assessment requires evidence that the candidate:
aspects of	1.1 Conducted self-management
Competency	1.2 Demonstrated interpersonal communication
	1.3 Demonstrated critical safe work habits
	1.4 Led small teams
	1.5 Planned and organized work
	1.6 Maintained professional growth and development
	1.7 Demonstrated workplace learning
	1.8 Demonstrated problem solving skills

	1.9 Demonstrated workplace ethics
2. Resource	The following resources should be provided:
Implications	2.1 Access to relevant workplace where assessment can take place
	2.2 Appropriately simulated environment where assessment can take
	place
3. Methods of	Competency in this unit may be assessed through:
Assessment	3.1 Oral questioning
	3.2 Portfolio of evidence
	3.3 Third Party Reports
	3.4 Written tests
4. Context of	Competency may be assessed:
Assessment	4.1 On-the-job
	4.2 Off-the –job
	4.3 During Industrial attachment
5. Guidance	Holistic assessment with other units relevant to the industry sector,
information	workplace and job role is recommended.
for assessment	

## DEMONSTRATE ENVIRONMENTAL LITERACY

UNIT CODE: SES/OS/CS/BC/06/5/A

## **UNIT DESCRIPTION**

This unit describes the competencies required to demonstrate understanding of environmental literacy. It involves controlling environmental hazard, controlling control environmental pollution, complying with workplace sustainable resource use, evaluating current practices in relation to resource usage, identifying environmental legislations/conventions for environmental concerns, implementing specific environmental programs and monitoring activities on environmental protection/programs.

## ELEMENTS AND PERFORMANCE CRITERIA

ELEMENT	PERFORMANCE CRITERIA
These describe the key	These are assessable statements which specify the
outcomes which make up	required level of performance for each of the elements.
workplace function.	
workplace function.	Bold and italicized terms are elaborated in the Range
1. Control	1.1 Storage methods for environmentally hazardous
environmental	materials are strictly followed according to
hazard	environmental regulations and OSHS.
	1.2 <i>Disposal methods</i> of hazardous wastes are
	followed always according to environmental
	regulations and OSHS.
	1.3 <b>PPE</b> is used according to OSHS.
2. Control	2.1 Environmental pollution <i>control measures</i> are
environmental	compiled following standard protocol.
Pollution control	2.2 Procedures for solid waste management are
	observed according to Environmental
	Management and Coordination Act 1999
	2.3 Methods for minimizing <i>noise pollution</i> is
	complied with based on <i>Noise</i> and Excessive
	Vibration Pollution and Control Regulations,
	2009
3. Demonstrate	3.1 Methods for minimizing wastage are complied
sustainable resource	with.
use	3.2 Waste management procedures are employed
	following principles of 3Rs (Reduce, Reuse,
	Recycle)
	3.3 Methods for economizing and reducing resource
	consumption are practiced as per the
	Environmental Management and Coordination Act
	1999
4. Evaluate current	4.1 Information on resource efficiency systems and

prostices in relation		proceduring are collected and provided to the result
practices in relation		<b>procedures</b> are collected and provided to the work
to resource usage	4.2	group where appropriate.
	4.2	Current resource usage is measured and recorded
	4.0	by members of the work group.
	4.3	Current purchasing strategies are analyzed and
		recorded according to industry procedures.
	4.4	Current work processes to access information and
		data is analyzed following enterprise protocol.
5. Identify	5.1	Environmental <i>legislations/conventions</i> and local
Environmental		ordinances are identified according to the different
legislations/convent		environmental aspects/impact
ions for	5.2	Industrial standard/environmental practices are
environmental		described according to the different environmental
concerns		concerns
6. Implement specific	6.1	Programs/Activities are identified according to
environmental		organizations policies and guidelines.
programs	6.2	Individual roles/responsibilities are
		determined and performed based on the activities
		identified.
	6.3	Problems/constraints encountered are resolved in
		accordance with organizations' policies and
		guidelines
	6.4	Stakeholders are consulted based on company
		guidelines
7. Monitor activities	7.1	Activities are periodically monitored and
on Environmental		evaluated according to the objectives of the
protection/Programs		environmental Program
	7.2	Feedback from stakeholders are gathered and
	(	considered in proposing enhancements to the
		program based on consultations
	7.3	Data gathered are analyzed based on evaluation
		requirements
	7.4	Recommendations are submitted based on the
		findings
	7.5	Management support systems are set/established
		to sustain and enhance the program
	7.6	Environmental incidents are monitored and
		reported to concerned/proper authorities

## **RANGE**

This section provides work environments and conditions to which the performance criteria apply. It allows for different work environments and situations that will affect performance.

Variable		Range
1.	PPE may include but not limited to:	<ul> <li>Mask</li> <li>Gloves</li> <li>Goggles</li> <li>Safety hat</li> <li>Overall</li> <li>Hearing protector</li> <li>Safety boots</li> </ul>
2.	Environmental pollution control measures may include but not limited to:	<ul> <li>Methods for minimizing or stopping spread and ingestion of airborne particles</li> <li>Methods for minimizing or stopping spread and ingestion of gases and fumes</li> <li>Methods for minimizing or stopping spread and ingestion of liquid wastes</li> </ul>
3.	Waste management procedures may include but not limited to:	<ul> <li>Sorting</li> <li>Storing of items</li> <li>Recycling of items</li> <li>Disposal of items</li> </ul>
4.	Resources may include but not limited to:	<ul> <li>Electric</li> <li>Water</li> <li>Fuel</li> <li>Telecommunications</li> <li>Supplies</li> <li>Materials</li> </ul>
5.	Workplace environmental hazards may include but not limited to:	<ul><li>Biological hazards</li><li>Chemical and dust hazards</li><li>Physical hazards</li></ul>
6.	Organizational systems and procedures may include but not limited to:	<ul> <li>Supply chain, procurement and purchasing</li> <li>Quality assurance</li> <li>Making recommendations and seeking approvals</li> </ul>

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit of competency.

## **Required Skills**

The individual needs to demonstrate the following skills:

- Observation
- Measuring
- Writing
- Communication
- Analytical

- Monitoring
- Evaluation

## Required Knowledge

The individual needs to demonstrate knowledge of:

- Storage methods of environmentally hazardous materials
- Disposal methods of hazardous wastes
- Usage of PPE Environmental regulations
- OSHS
- Types of pollution
- Environmental pollution control measures
- Different solid wastes
- Solid waste management
- Different noise pollution
- Methods of minimizing noise pollution
- Solid Waste Act
- Methods of minimizing wastage
- Waste management procedures
- Economizing of resource consumption
- 3Rs principle
- Types of resources
- Techniques in measuring current usage of resources
- Calculating current usage of resources
- Types of workplace environmental hazards
- Environmental regulations
- Environmental regulations applying to the enterprise.
- Measurement and recording of current resource usage
- Analysis current work processes to access information and data Analysis of data and information
- Identification of areas for improvement
- Resource consuming processes
- Determination of quantity and nature of resource consumed
- Analysis of resource flow of different parts of the resource flow process
- Use/conversion of resources
- Causes of low efficiency of use
- Increasing the efficiency of resource use
- Inspection of resource use plans
- Regulations/licensing requirements
- Determine benefit/cost for alternative resource sources
- Benefit/costs for different alternatives
- Components of proposals
- Criteria on ranking proposals
- Regulatory requirements
- Proposals for improving resource efficiency
- Implementation of resource efficiency plans

- Procedures in monitor implementation
- Adjustments of implementation plan
- Inspection of new resource usage

## **EVIDENCE GUIDE**

This provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge and range.

1 0.441	Assessment manning and damps that the arm did at
1. Critical	Assessment requires evidence that the candidate:
Aspects of	1.1 Controlled environmental hazard
Competency	1.2 Controlled environmental pollution
	1.3 Demonstrated sustainable resource use
	1.4 Evaluated current practices in relation to resource
	usage
	1.5 Demonstrated knowledge of environmental legislations
	and local ordinances according to the different
	environmental issues /concerns.
	1.6 Described industrial standard environmental practices
	according to the different environmental
	issues/concerns.
	1.7 Resolved problems/ constraints encountered based on
	management standard procedures
	1.8 Implemented and monitored environmental practices
	on a periodic basis as per company guidelines
	1.9 Recommended solutions for the improvement of the
	Program
	1.10 Monitored and reported to proper authorities any
	environmental incidents
2. Resource	The following resources should be provided:
Implications	2.1 Workplace with storage facilities
	2.2 Tools, materials and equipment relevant to the tasks
	(ex. Cleaning tools, cleaning materials, trash bags, etc.)
	2.3 PPE
	2.4 Manuals and references
	2.5 Legislation, policies, procedures, protocols and local
	ordinances relating to environmental protection
	2.6 Case studies/scenarios relating to environmental
	Protection
3. Methods of	Competency in this unit may be assessed through:
Assessment	3.1 Observation
	3.2 Oral questioning
	3.3 Written test
	3.4 Interview/Third Party Reports
	3.5 Portfolio of evidence
4. Context of	Competency may be assessed:
Assessment	4.1 On-the-job
	4.1 Off-the –job

	4.3 During Industrial attachment
5. Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## DEMONSTRATE OCCUPATIONAL SAFETY AND HEALTH PRACTICES

UNIT CODE: SES/OS/CS/BC/07/5/A

## **UNIT DESCRIPTION**

This unit specifies the competencies required to identify workplace hazards and risk, identify and implement appropriate control measures and implement OSH programs, procedures and policies/ guidelines

## ELEMENTS AND PERFORMANCE CRITERIA

ELEMENT	PERFORMANCE CRITERIA
These describe the key outcomes which make up workplace function.	These are assessable statements which specify the required level of performance for each of the elements.  Bold and italicized terms are elaborated in the Range
1 11-46	1.1 There is the model of a continue of the Continue of
Identify workplace     hazards and risk	1.1 <i>Hazards</i> in the workplace are identified <i>based</i>
nazards and risk	their indicators
	1.2 Risks and hazards are evaluated based on legal
	requirements.
	1.3 <i>OSH concerns</i> raised by workers are addressed as
2 G + 100H	per legal requirements.
2. Control OSH	2.1 Hazard prevention <i>and control measures</i> are
hazards	implemented as per legal requirement.
	2.2 Risk assessment is conducted and a risk matrix
	developed based on likely impact.
	2.3 Contingency measures, including emergency
	procedures during workplace incidents and
	emergencies are recognized and established in
	accordance with organization procedures.
3. Implement OSH	3.1 Company OSH program are identified, evaluated
programs	and reviewed based on legal requirements.
	3.2 Company OSH programs are implemented as per
	legal requirements.
	3.3 Workers are capacity built on OSH standards and
	procedures as per legal requirements
	3.4 <i>OSH-related records</i> are maintained as per legal requirements.

## **RANGE**

This section provides work environments and conditions to which the performance criteria apply. It allows for different work environments and situations that will affect performance.

Variable	Range
Hazards may include but are not limited to:	<ul> <li>Physical hazards</li> <li>Biological hazards</li> <li>Chemical hazards</li> <li>Ergonomics</li> <li>Psychological factors</li> <li>Physiological factors</li> <li>Safety hazards</li> <li>Unsafe workers' act</li> </ul>
2. Indicators may include but are not limited to:	Increased of incidents of accidents, injuries
3. Evaluation and/or work environment measurements may include but are not limited to:	Work Salety and Health Evaluation
4. OSH issues and/or concerns may include but are not limited to:	<ul> <li>Workers' experience/observance on presence of work hazards</li> <li>Unsafe/unhealthy administrative arrangements (prolonged work hours, no break time, constant overtime, scheduling of tasks)</li> <li>Reasons for compliance/non-compliance to use of PPEs or other OSH procedures/policies/guidelines</li> </ul>
5. Prevention and control measures may include but ar not limited to:	<ul><li>Eliminate the hazard</li><li>Isolate the hazard</li></ul>

6. Safety gears /PPE (Personal Protective Equipment's) may include but are not limited to:  7. Appropriate risk controls	<ul> <li>Arm/Hand guard, gloves</li> <li>Eye protection (goggles, shield)</li> <li>Hearing protection (ear muffs, ear plugs)</li> <li>Hair Net/cap/bonnet</li> <li>Hard hat</li> <li>Face protection (mask, shield)</li> <li>Apron/Gown/coverall/jump suit</li> <li>Anti-static suits</li> <li>High-visibility reflective vest</li> <li>Eliminate the hazard altogether</li> <li>Isolate the hazard from anyone who could be harmed</li> <li>Substitute the hazard with a safer alternative</li> <li>Use administrative controls to reduce the risk</li> <li>Use engineering controls to reduce the risk</li> <li>Use personal protective equipment</li> </ul>
8. Contingency measures may include but are not limited to:	<ul> <li>Evacuation</li> <li>Isolation</li> <li>Decontamination</li> <li>Emergency personnel</li> </ul>
9. Emergency procedures may include but are not limited to:	<ul> <li>Fire drill</li> <li>Earthquake drill</li> <li>Basic life support/CPR</li> <li>First aid</li> <li>Spillage control</li> <li>Decontamination of chemical and toxic</li> <li>Disaster preparedness/management</li> <li>Set of fire-extinguisher</li> </ul>
10. Incidents and emergencies may include but are not limited to:	<ul> <li>Chemical spills</li> <li>Equipment/vehicle accidents</li> <li>Explosion</li> <li>Fire</li> <li>Gas leak</li> <li>Injury to personnel</li> <li>Structural collapse</li> <li>Toxic and/or flammable vapors emission.</li> </ul>
11. OSH-related Records may include but are not limited to:	<ul> <li>Medical/Health records</li> <li>Incident/accident reports</li> <li>Sickness notifications/sick leave application</li> <li>OSH-related trainings obtained</li> </ul>

# REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit of competency.

## **Required Skills**

The individual needs to demonstrate the following skills:

- Communication
- Interpersonal
- Presentation
- Risk assessment
- Evaluation
- Critical thinking
- Problem solving
- Negotiation

## Required Knowledge

The individual needs to demonstrate knowledge of:

- General OSH Principles
- Occupational hazards/risks recognition
- OSH organizations providing services on OSH evaluation and/or work environment measurements (WEM)
- National OSH regulations; company OSH policies and protocols
- Systematic gathering of OSH issues and concerns
- General OSH principles
- National OSH regulations
- Company OSH and recording protocols, procedures and policies/guidelines
- Training and/or counseling methodologies and strategies

## **EVIDENCE GUIDE**

This provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge and range.

1. Critical	Assessment requires evidence that the candidate:
Aspects of	1.1 Identified hazards in the workplace based their
Competency	indicators
	1.2 Evaluated workplace hazards based on legal requirements.
	1.3 Addressed OSH concerns raised by workers as per legal requirements.
	1.4 Implemented hazard prevention and control measures as per legal requirement.
	1.5 Conducted risk assessment as per legal requirement.
	1.6 Developed risk matrix based on likely impact.
	1.7 Recognized and established contingency measures in
	accordance with organization procedures.

-		,
		1.8 Identified, evaluated and reviewed company OSH
		program based on legal requirements.
		1.9 Implemented company OSH programs as per legal requirements.
		1.10 Capacity built workers on OSH standards and
		procedures as per legal requirements
		1.11 Maintained OSH-related records as per legal
		requirements.
2.	Resource	The following resources should be provided:
	Implications	2.1 Access to relevant workplace where assessment can
	1	take place
		2.2 Appropriately simulated environment where
		assessment can take place
	3.6.4.1.1.6	•
3.	Methods of	Competency in this unit may be assessed through:
	Assessment	3.1 Observation
		3.2 Oral questioning
		3.3 Written test
		3.4 Portfolio of Evidence
		3.5 Interview
		3.6 Third party report
4.	Context of	Competency may be assessed:
	Assessment	4.1 On-the-job
		4.2 Off-the –job
		4.3 During Industrial attachment
5.	Guidance	Holistic assessment with other units relevant to the industry
	information	sector, workplace and job role is recommended.

## COMMON UNITS OF COMPETENCY

easylvet.com

## **DEMONSTRATE DIGITAL LITERACY**

UNIT CODE: SEC/OS/CS/CC/01/6/A

## UNIT DESCRIPTION

This unit covers the competencies required to effectively use digital devices such as smart phones, tablets, laptops and desktop PCs. It entails identifying appropriate computer software and hardware, applying security measures to data, hardware, and software in automated environment, computer software in solving tasks, internet and email in communication at workplace, desktop publishing in official assignments and preparing presentation packages.

## **ELEMENTS AND PERFORMANCE CRITERIA**

ELEMENT	PERFORMANCE CRITERIA
These describe the	These are assessable statements which specify the required
key outcomes which	level of performance for each of the elements.
make up workplace	Bold and italicized terms are elaborated in the Range
functions.	
1. Identify	1.1 Concepts of ICT are determined in accordance with
appropriate	computer equipment.
computer	1.2 Classifications of computers are determined in accordance
software and	with manufacturer's specification.
hardware.	1.3 Appropriate computer software is identified according to manufacturer's specification.
	1.4 Appropriate computer hardware is identified according to
	manufacturer's specification.
	1.5 Functions and commands of operating system are
	determined in accordance with manufacturer's
	specification.
2. Apply security	2.1 Data security and privacy are classified in accordance
measures to data,	with the prevailing technology.
hardware, and	2.2 Security threats are identified, and control measures are
software in	applied in accordance with laws governing protection of
automated	ICT.
environment.	2.3 Computer threats and crimes are detected.
	2.4 Protection against computer crimes is undertaken in
	accordance with laws governing protection of ICT.
3. Apply computer	3.1 Word processing concepts are applied in resolving
software in	workplace tasks, report writing and documentation.
solving tasks	3.2 Word processing utilities are applied in accordance with
	workplace procedures.
	3.3 Worksheet layout is prepared in accordance with work
	procedures.
	3.4 Worksheets are built, and data manipulated in the
	worksheets in accordance with workplace procedures.
	3.5 Continuous data manipulated on worksheet is undertaken

ELEMENT	PERFORMANCE CRITERIA
These describe the	These are assessable statements which specify the required
key outcomes which	level of performance for each of the elements.
make up workplace	Bold and italicized terms are elaborated in the Range
functions.	
	in accordance with work requirements
	3.6 Database design and manipulation is undertaken in
	accordance with office procedures.
	3.7 Data sorting, indexing, storage, retrieval and security is
	provided in accordance with workplace procedures.
4. Apply internet	4.1 Electronic mail addresses are opened and applied in
and email in	workplace communication in accordance with
communication	ORGANIZATION ICT policy.
at workplace.	4.2 Office internet functions are defined and executed in
	accordance with office procedures.
	4.3 Network configuration is determined in accordance with
	office operations procedures.
	4.4 <b>Security measures</b> are put in place in line with the
	organization's ICT policy
	4.5 Official World Wide Web is installed and managed
	according to workplace procedures.
5. Apply Desktop	5.1 Desktop publishing functions and tools are identified in
publishing in	accordance with manufactures specifications.
official	5.2 Desktop publishing tools are developed in accordance with
assignments.	work requirements.
	5.3 Desktop publishing tools are applied in accordance with
	workplace requirements.
	5.4 Typeset work is enhanced in accordance with workplace
	standards.
6. Prepare	6.1 Types of presentation packages are identified in
presentation	accordance with office requirements.
packages.	6.2 Slides are created and formulated in accordance with
	workplace procedures.
	6.3 Slides are edited and run in accordance with work
	procedures.
	6.4 Slides and handouts are printed according to work
	requirements.

## **RANGE**

This section provides work environments and conditions to which the performance criteria apply. It allows for different work environments and situations that will affect performance.

Variable		Range	
1.	Appropriate computer hardware may includes but not limited to:	<ul> <li>Computer case, monitor, keyboard, and mouse</li> <li>All the parts inside the computer case, such as the hard disk drive, motherboard and video card.</li> </ul>	
2.	Data security and privacy may includes but not limited to:	<ul> <li>Confidentiality of data.</li> <li>Cloud computing.</li> <li>Authenticity</li> <li>Availability</li> <li>Integrity</li> <li>Non-repudiation</li> <li>Integrity-but-curious data surfing.</li> </ul>	
3.	Security and control Measures may include but not limited to:	<ul> <li>Counter measures against cyber terrorism.</li> <li>Risk reduction.</li> <li>Cyber threat issues.</li> <li>Risk management.</li> <li>Pass-wording.</li> <li>Authorization</li> <li>Encryption</li> </ul>	
4.	Security threats may includes but not limited to:	<ul><li>Cyber terrorism.</li><li>Hacking.</li></ul>	

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit of competency.

#### **Required Skills**

The individual needs to demonstrate the following skills:

- Analytical skills.
- Interpretation.
- Typing.
- Communication.
- Computing applying arithmetic operations.
- Basic ICT skills.

## Required Knowledge

The individual needs to demonstrate knowledge of:

- Functions of computer software and hardware.
- Data security and privacy.
- Computer security threats and control measures.
- Technology underlying cyber-attacks and networks.
- Cyber terrorism and computer crimes.
- Detection and protection of computer crimes.
- Laws governing protection of ICT.
- Functions and concepts of word processing.
  - o Documents and tables creation and manipulations.
  - o Mail merging.
  - o Word processing utilities.
- Spread sheets;
- Meaning, formulae, function and charts, uses and layout.
- Data formulation, manipulation and application to cells.
- Database;
- Database design, data manipulation, sorting, indexing, storage retrieval and security
- Desktop publishing;
- Designing and developing desktop publishing tools.
- Manipulation of desktop publishing tools.
- Enhancement of typeset work and printing documents.
- Presentation Packages;
- Types of presentation packages.
- Creating, formulating, running, editing, printing and presenting slides and handouts.
- Networking and Internet;
- Computer networking and internet.
- Electronic mail and World Wide Web.
- Emerging trends and issues in ICT;
- Identify and integrate emerging trends and issues in ICT.
- Challenges posed by emerging trends and issues.

## **EVIDENCE GUIDE**

This provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge and range.

1. Critical Aspects of Competency.  Assessment requires evidence that the candidate:  1.1 Identified and controlled security threats.  1.2 Detected and protected computer crimes.  1.3 Applied word processing in office tasks.  1.4 Designed, prepared work sheet and applied data to the cells in accordance to workplace procedures.  1.5 Opened electronic mail for office communication as per workplace procedure.  1.6 Installed internet and World Wide Web for office tasks in accordance with office procedures.  1.7 Integrated emerging issues in computer ICT applications.  1.8 Applied laws governing protection of ICT.  2. Resource Implications for competence certification  2.1 Access to relevant workplace where assessment can take place  2.2 Appropriately simulated environment where assessment can take place  2.3 Materials relevant to the proposed activity or tasks  3. Methods of Assessment.  3.1 Written Test.  3.2 Demonstration.  3.3 Practical assignment.  3.4 Interview/Oral Questioning.  3.5 Demonstration.  Competency may be assessed in an off and on the job setting.  Competency may be assessed in an off and on the industry sector, workplace and job role is recommended.	1		
1.2 Detected and protected computer crimes.  1.3 Applied word processing in office tasks.  1.4 Designed, prepared work sheet and applied data to the cells in accordance to workplace procedures.  1.5 Opened electronic mail for office communication as per workplace procedure.  1.6 Installed internet and World Wide Web for office tasks in accordance with office procedures.  1.7 Integrated emerging issues in computer ICT applications.  1.8 Applied laws governing protection of ICT.  2. Resource Implications for competence certification  5. Methods of Assessment.  1.8 Applied laws governing protection of ICT.  2. Resource Implications for competence certification  2.1 Access to relevant workplace where assessment can take place  2.2 Appropriately simulated environment where assessment can take place  2.3 Materials relevant to the proposed activity or tasks  3. Methods of Assessment.  3.1 Written Test.  3.2 Demonstration.  3.3 Practical assignment.  3.4 Interview/Oral Questioning.  3.5 Demonstration.  4. Context of Assessment.  5. 1. Perform troubleshooting	as per the workplace procedures	
	1.2 <i>Hardware and software are</i> diagnosed in line	
	with the standard operating procedure	
	1.3 Testing and troubleshooting tools are established	
	as pert the industry best practices	
	2.1 Components to be dismantled are identified	
2. Dismantle faulty	2.2 Components are dismantled in line with the	
components	manufacturer's manuals	
	2.3 Dismantling tools and components are	
	established in standard operating procedures	
	2.4 Component handling is aligned to the standard	
	operating procedures	
	3.1 Diagnostic tools and instruments are identified as	
3. Repair/Replace faulty	per the workplace policy	
components	3.2 Components functionality is tested as per the	
	manufacturer's manuals	
	3.3 Test parameters are compared with the expected	
	output in line with the manufacturer's manuals	
	3.4 Faulty components are identified and removed as	
	per the standard operating procedure	
	3.5 Faulty components are repaired/replaced in line	
	with manufacturers manuals	
	3.6 Repaired/replaced components are tested for	
	their functionality according to standard	
	operating procedure	
	3.7 Components are reassembled, and continuous monitoring performed as per the industries best	
	practice	

ELEMENT  These describe the key outcomes which make up workplace function.	PERFORMANCE CRITERIA  These are assessable statements which specify the required level of performance for each of the elements.  (Bold and italicised terms are elaborated in the Range)
4. Upgrade computer hardware/software	<ul> <li>4.1 Tools in managing software updates are established as per the industry best practice</li> <li>4.2 Test environment is developed for hardware and software as per industry best practices</li> <li>4.3 Licensed software and hardware are used in computer upgrades as per the organizations <i>ICT policy</i></li> <li>4.4 Schedule updates in lines with the organization policy</li> <li>4.5 Upgraded computer hardware and software are tested in line with the organization policy</li> </ul>
Prepare and document maintenance report	<ul> <li>5.1 Maintenance report is prepared in line with the organizations approved format</li> <li>5.2 Maintenance report is shared with the relevant parties</li> <li>5.3 Prepared report is filed as per the organizations policy</li> </ul>

## **RANGE**

This section provides work environment and conditions to which the performance criteria apply. It allows for different work environment and situations that will affect performance.

Variable	Range
Hardware may includes but not limited to:	<ul> <li>Desktops</li> <li>Central process unit (CPU)</li> <li>Laptops</li> <li>Mobile phones</li> <li>Server boxes</li> <li>Hard drives</li> <li>Routers</li> <li>Switches</li> </ul>
2. Software may includes but not limited to:	<ul><li>Preventive</li><li>Detective</li><li>Responsive</li></ul>

## REQUIRED KNOWLEDGE AND UNDERSTANDING

The individual needs to demonstrate knowledge and understanding of:

- Security risk management techniques and procedures
- Types of security threats and their control measures
- Security audit procedures
- ICT security policy
- Strategies for Mitigating risks
- Categories of Security threats
- Penetration testing skills

## FOUNDATION SKILLS

The individual needs to demonstrate the following foundation skills:

- Communications (verbal and written);
   Decisio
- Time management;
- Penetration Skills
- Problem solving;
- Planning;

- Decision making;
- Report writing;

#### **EVIDENCE GUIDE**

This provides advice on assessment and must be read in conjunction with the performance criteria, required skills and understanding and range.

1. Critical Aspects of Competency

Assessment requires evidence that the candidate:

- 1.1 Diagnosed software and hardware in line with the standard operating procedure
- 1.2 Dismantled components in line with the manufacture's manuals
- 1.3 Tested components functionality as per the manufacturer's manuals
- 1.4 Tested repaired/replaced components functionality according to standard operating procedure
- 1.5 Monitoring reassembled components as per the industries best practice
- 1.6 Test environment was developed for hardware and software as per industry best practices
- 1.7 Prepared maintenance report in line with organizations approved format
- 1.8 Tested upgraded computer hardware and software were tested in line with the organization policy
- 1.9 Security threats were identified and classified as per the organization ICT policy
- 1.10 Security control measures were identified and

# DEMONSTRATE UNDERSTANDING OF CYBER SECURITY LAWS, POLICIES AND REGULATIONS

UNIT CODE: SEC/OS/CS/CR/02/6/A

## **UNIT DESCRIPTION**

This unit covers the competencies required in applying Cyber security laws, policies and regulations. They include demonstrating the understanding of cyber security policies, laws and regulations, demonstrating understanding of different cyber security policies and regulation, participating in developing cyber security polices, implementing Cyber security policies and regulations, participating in evaluating cyber security policies, evaluating compliance in Cyber security policies and regulations and monitoring effectiveness of Cyber security policy in an organization.

#### ELEMENTS AND PERFORMANCE CRITERIA

	PERFORMANCE CRITERIA	
ELEMENT  These describe the key outcomes which make up workplace function.	These are assessable statements which specify the required level of performance for each of the elements  (Bold and italicised terms are elaborated in the Range)	
Demonstrate     understanding of cyber     security polices, laws     and regulations	<ol> <li>Different cyber security laws are identified based on the available world's legal systems.</li> <li>Various types of cyber-crimes are identified based on the existing and emerging treats</li> <li>Cyber crime laws are identified based on the country's legal framework.</li> <li>Cyber security laws are applied as per the country's legal system</li> <li>Cyber security laws are complied with as per the organizations or country's legal framework.</li> <li>Impacts of cyber crimes are identified according to country's social economic factors</li> </ol>	
2. Demonstrate understanding of different Cyber security policies and regulations	<ul> <li>2.1 Different types of cyber security policies and regulations are identified</li> <li>2.2 Application of different cyber security policies are determined as per the industry best practice</li> <li>2.3 Policies and regulation stakeholders are identified</li> </ul>	
3. Participate in developing Cyber Security policy	3.1 <i>Infrastructure and components</i> for cyber security policy are identified and classified	

PERFORMANCE CRITERIA
These are assessable statements which specify the required level of performance for each of the elements  (Pald and italiaised terms are algebrated in the
(Bold and italicised terms are elaborated in the Range)
<ul> <li>3.2 Nature and operations of the business aligned to the policy is established</li> <li>3.3 Draft cyber security policy is developed in line with the known industrial standards and the laws of the land</li> <li>3.4 Review drafted cyber security policy in line with the industry best practice</li> </ul>
4.1 Cyber security policy is adopted for implementation as per the organization requirements
<ul><li>4.2 Cyber security policy implementation team is constituted in line with the organization requirements</li><li>4.3 Implementation schedule is prepared as per the</li></ul>
organization requirement 4.4 Initiation of the cyber security policy
implementation schedule is performed in line with organization policies
4.5 Cyber security policy implementation process is monitored in line with the established schedule
4.6 Cyber security policy and regulation implementation is verified as per the substantive law and organization policies
5.1 Continuous review and updates of cyber security policy is performed in line with organization requirements
5.2 Cyber security policy is evaluated in line with the cyber security emerging trends
<ul><li>6.1 Infrastructure landscape is audited in line with the organization Cyber security policy and regulations</li><li>6.2 Risk factors for non-compliance are calculate as</li></ul>
per the industry best standards 6.3 Recommendation are reported on the compliance level as per the policy and regulations
<ul><li>7.1 Adoption levels are determined in line with organization requirements</li><li>7.2 Cyber security policy impact on technologies,</li></ul>
_

	PERFORMANCE CRITERIA	
ELEMENT  These describe the key outcomes which make up workplace function.	These are assessable statements which specify the required level of performance for each of the elements  (Bold and italicised terms are elaborated in the	
	Range)	
	process and people within the organization is monitored as per the organization policy.  7.3 Effectiveness of the Cyber security policy implemented is monitored in line with organization requirement	

## **RANGE**

This section provides work environment and conditions to which the performance criteria apply. It allows for different work environment and situations that will affect performance.

Variable	Range
1. Components and	Software
infrastructure may	Hardware
include but not	People
limited to:	Data
	Procedures
	Information

## REQUIRED KNOWLEDGE AND UNDERSTANDING

The individual needs to demonstrate knowledge and understanding of:

- Troubleshooting techniques
- Cyber security infrastructure auditing procedures
- Cyber security safety and precautious measures
- Cyber security prevention measures
- Performance monitoring techniques
- Cyber security policy
- Causes of hardware and software failure
- Components of cyber security infrastructure
- User training procedures

#### **FOUNDATION SKILLS**

The individual needs to demonstrate the following additional skills:		
Communications (verbal and written);	<ul><li>Decision making;</li><li>Report writing;</li></ul>	

Proficient in ICT;
Time management;
Analytical
Problem solving;
Planning;

## EVIDENCE GUIDE

This provides advice on assessment and must be read in conjunction with the performance criteria, required skills and understanding and range.

1. Critical Aspects	Assessment requires evidence that the candidate:	
of Competency	1.1 Identified different types of cyber security policies and regulations	
	1.2 Determined application of different cyber security policies as per the industry best practice	
	1.3 Developed a draft of cyber security policy in line with the known industrial standards and the laws of the land	
	1.4 Prepared implementation schedule as per the organization requirement	
	<ul> <li>1.5 Evaluated cyber security policy line with the cyber security trends</li> <li>1.6 Calculated risk factors for non-compliance as per the industry best standards</li> <li>1.7 Reported recommendations on the compliance level as per the policy and regulations</li> </ul>	
	1.8 Monitored Cyber security policy impact on technologies, process and people within the organization as per the organization policy	
	1.9 Monitored effectiveness of the Cyber security policy	
	implementation in line with the organization requirement	
	1.10 Performed audit on existing cyber security components	
	and infrastructure	
	1.11 Verified drafted cyber security policy in line with the standard operating procedure	
2. Resource	The following resources should be provided:	
Implications	2.1 Access to relevant workplace where assessment can	
for competent	take place	
certification	2.2 Appropriately simulated environment where	
	assessment can take place	
	2.3 Materials relevant to the proposed activity or tasks	
3. Methods of	Competency may be assessed through:	
Assessment	3.1 Oral questioning	
	3.2 Written tests	
	3.3 Practical demonstration	

		3.4 Observation
4.	Context of Assessment	Competency may be assessed individually in the actual workplace or through simulated work environment
5.	Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## PERFORM COMPUTER NETWORKING

UNIT CODE: SEC/OS/CS/CR/03/6/A

## **UNIT DESCRIPTION**

This unit covers the competencies required to perform computer networking activities. It involves identifying network types, configuring network devices, connecting network devices, monitoring network performance, documenting network report, training network users and maintaining of the network.

## ELEMENTS AND PERFORMANCE CRITERIA

	PERFORMANCE CRITERIA
ELEMENT	
ELEVIENI	These are assessable statements which specify the
These describe the key	required level of performance for each of the
outcomes which make up	elements.
workplace function.	(Bold and italicised terms are elaborated in the
	Range)
1. Identify network type	1.1. Site survey is conducted to determine the user
	needs and establish network topology
	1.2. Network design is developed according to the
	site survey
	1.3. <i>Network components</i> are identified according
	to the site survey
	1.4. <i>Network type</i> is identified as per the client's
	requirements
2. Configure network devices	2.1. <i>Network</i> is installed and configured according
	to network installation manual.
	2.2.IP addressing scheme, subnet masking and
	routing <i>protocol</i> configuration is performed
	2.3.Network segmentation is determined as per the
	Network design.
	2.4. <i>Network privileges</i> are allocated according to
	the network configuration.
	2.5.Network types are configured as per the type of
	connection
3. Connect network devices	3.1.Tools, materials and devices for network are
2. Connect network devices	identified according to the network type
	3.2.Network connection is performed according to
	National and international communication
	standards and protocols
	3.3.Stability and connectivity tests of cables and
	equipment is done as per the network type
	3.4. Media management is performed as per the
	industry best practice

ELEMENT  These describe the key outcomes which make up workplace function.	PERFORMANCE CRITERIA  These are assessable statements which specify the required level of performance for each of the elements.  (Bold and italicised terms are elaborated in the
4. Monitor Network performance	<ul> <li>Range)</li> <li>4.1.Network monitoring tools are identified as per the type of tests to be carried out</li> <li>4.2.Network monitoring tools are deployed as per the network connection type.</li> <li>4.3.Network status is determined as per the monitoring report.</li> <li>4.4.Network is monitored in line with its operation</li> </ul>
5. Document network report	manual  5.2 Networking report is prepared and filed in the approved format as per the organization policy  5.3 Networking report is shared with the relevant parties  5.4 Test results are document as per the organizations policy  5.5 Network reports are stored in the in the relevant department for reference purpose as per the organization policy
6. Train network users	6.1.Network user are trained on its operation in line with its installation manual 6.2.Users are identified as per the network coverage 6.3.Users are provided with the network operation manual 6.4.User training manuals are prepared according to network functionality 6.5.User training is done according to the user training manual
7. Maintain Network	<ul> <li>7.1.Network is optimized between the network components and medium in line with the operation manual.</li> <li>7.2.Network security is applied according to vulnerability of the Network.</li> <li>7.3.Maintenance schedule is prepared as per the task to be carried out.</li> <li>7.4.Network updates are scheduled as per the organization policy</li> </ul>

## **RANGE**

This section provides work environment and conditions to which the performance criteria apply. It allows for different work environment and situations that will affect performance.

Variable	Range
Network topology     may includes but no     limited to:	<ul> <li>Star</li> <li>Ring</li> <li>Mesh</li> <li>Hybrid</li> <li>Point to point</li> </ul>
Network componen     may includes but no     limited to:	- C:4-1
3. Network types may includes but not limited to:	<ul><li>WAN</li><li>LAN</li><li>PAN</li></ul>
4. Network protocols may includes but no limited to:	• TCPIP • UDP • HTT
5. Monitoring tools may includes but no limited to:	<ul> <li>Ping</li> <li>Tracert</li> <li>Speed test</li> </ul>
6. Network privileges may includes but no limited to:	<ul> <li>Pprivilege allows a user to perform an action.</li> <li>The ability to create a file in a directory, or to read or delete a file, access a device, or have read or write permission to a socket for communicating over the Internet</li> </ul>
7. Network security Measures may includes but not limited to:	<ul> <li>Intrusion detection systems</li> <li>Patching and Updating</li> <li>Port Scanners</li> <li>Network Sniffers</li> <li>Vulnerability scanners</li> <li>Antiviruses</li> </ul>

## REQUIRED KNOWLEDGE AND UNDERSTANDING

The individual needs to demonstrate knowledge and understanding of:

- Network Architecture
- Network programming languages
- Network Components and devices
- Network types
- Network security Measures
- Network Monitoring procedures
- Network testing techniques
- Network configuration techniques
- Network protocols
- Network security techniques and procedures
- Network testing procedures

## FOUNDATION SKILLS

The individual needs to demonstrate the following foundation skills:

- Communications (verbal and written);
- Proficient in ICT;
- Problem solving
- Decision Making
- Leadership
- Self-training

## **EVIDENCE GUIDE**

This provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and understanding and range.

1. Critical Aspects	Assessment requires evidence that the candidate:
of Competency	1.1 Conducted site survey on determining the user needs and
	establishing of network topology
	1.2 Developed network design in line with the site survey
	1.3 Performed IP addressing scheme, subnet masking and
	routing protocol configuration of the network
	1.4 Network privileges are allocated according to the network configuration.
	1.5 Performed network connection according to the National
	and international communication standards
	1.6 Identified network monitoring as per the type of tests that were to be carried out
	1.7 Monitored network protocols in line with its operation manual
	1.8 Prepared and filled network report in line with the
	approved format of the organization

		100
		1.9 Prepared user training manuals according to the software
		functionality
		1.10 Applied network security according to the vulnerability
		of the Network
		1.11Components were identified during site survey
2.	Resource	The following resources should be provided:
	Implications	2.1 Access to relevant workplace where assessment can
	for competent	take place
	certification	2.2 Appropriately simulated environment where
		assessment can take place
		2.3 Materials relevant to the proposed activity or tasks
3.	Methods of	Competency may be assessed through:
	Assessment	3.1 Observation
		3.2 Oral questioning
		3.3 Practical demonstration

		place
5.	Guidance	Holistic assessment with other units relevant to the industry
	information for	sector, workplace and job role is recommended.
	assessment	

## SECURE SOFTWARE APPLICATION

UNIT CODE: SEC/OS/CS/CR/04/6/A

## **UNIT DESCRIPTION**

This unit covers the competencies required to secure software application. Competencies includes: Identifying software to be secured, establishing tools for application security assessment, perform application security assessment, hardening software application, monitoring application security performance and preparing of reports on software security.

## ELEMENTS AND PERFORMANCE CRITERIA

	PERFORMANCE CRITERIA	
ELEMENT  These describe the key outcomes which make up workplace function.	These are assessable statements which specify the required level of performance for each of the elements.  (Bold and italicised terms are elaborated in the	
1	Range)	
Identify software to be secured	<ul> <li>1.1 Software is identified in line with manufacturers</li> <li>1.2 Software use is established as per its applications</li> <li>1.3 Software platform diversity is established according to manufactures user guides</li> </ul>	
2. Establish tools for application security assessment	<ul> <li>2.1 Types of tools are identified according to the platform of use</li> <li>2.2 Network communication is adhered to in tools identification</li> <li>2.3 Tools are identified as per their availability and cost</li> <li>2.4 Tools are identified as per the data size</li> <li>2.5 Tools are identified according to the environment of use.</li> <li>2.6 Tools identification is performed as per the nature of the software</li> <li>2.7 Tools are established as per the type of hardware and software</li> <li>2.8 Tools are selected as per the expected outcome of the application security assessment.</li> </ul>	
Perform application security assessment	<ul> <li>3.1 Application assessment is performed in line with national and international standards</li> <li>3.2 Application assessment is conducted as per the ISO 27001</li> <li>3.3 Assessment is performed in line with NIST</li> </ul>	
4. Harden software application	4.1 Configuration is performed as per the manufacturers guide, ICT regulations and industries best practice	

	PERFORMANCE CRITERIA	
ELEMENT  These describe the key outcomes which make up	These are assessable statements which specify the required level of performance for each of the elements.  (Bold and italicised terms are elaborated in the Range)	
workplace function.		
	4.2 <b>Security measures</b> are put around the software according ICT policy	
	4.3 Access control measures are set up in line	
	organizations ICT policy	
	4.4 Valid licenses are installed in software as per the manufacturer's guides	
	4.5 Software is monitored continuously as per its operations	
	4.6 Security updates and patches are installed in line with manufacturers guidelines	
	4.7 Environment of software use is secured as per the organization policy	
5. Monitor application security performance	5.1 Monitoring solution is implemented in line with organization policy	
geometry personnance	5.2 Logs are monitored as per the organization ICT policy	
	5.3 Continuous security assessment is conducted as per the industries best practice	
	5.4 Application security performance is measured in line with its uptime period	
6. Prepare a report on	6.1 Software security reports are prepared in line	
software security	with the organizations approved format 6.2 Software security reports are shared with relevant parties as per the organization policy	
	6.3 Software security reports are documented and filled according organization filing system	
	6.4 Software security risk mitigation	
	recommendations are prepared and shared with the relevant parties	

## **RANGE**

This section provides work environments and conditions to which the performance criteria apply. It allows for different work environments and situations that will affect performance.

Variable	Range
1. ICT components and	Software
infrastructure may	Hardware
include but not	People
limited to:	• Data
	Procedures

- ICT Infrastructure auditing procedures
- ICT safety and precautious measures
- ICT Prevention measures
- Performance monitoring techniques
- ICT policy
- Causes of hardware and software failure
- Components of ICT Infrastructure
- User training procedures

## FOUNDATION SKILLS

The individual needs to demonstrate the following additional skills:		
<ul> <li>Communications (verbal and written);</li> <li>Proficient in ICT;</li> <li>Time management;</li> <li>Analytical</li> <li>Problem solving;</li> <li>Planning;</li> </ul>	<ul><li>Decision making;</li><li>Report writing;</li></ul>	

## **EVIDENCE GUIDE**

This provides advice on assessment and must be read in conjunction with the performance criteria, required skills and understanding and range.

1.	Critical Aspects of Competency	Assessment requires evidence that the candidate:  1.1 Software was identified in line with manufacturers 1.2 Software use was established as per its applications 1.3 Tools identification was performed as per the nature of the software 1.4 Application assessment was performed in line with OWASP 1.5 Configuration was performed as per the manufactures
		guide, ICT regulations and industries best practice  1.6 Valid licenses were installed in software as per the manufacturer's guides  1.7 Security updates and patches were installed in line with manufacturers guidelines  1.8 SIEM solution was implemented in line with organization policy  1.9 Software security reports were shared with relevant parties as per the organization policy  1.10 Environment of software use is secured as per the organization policy
2.	Resource Implications for competent certification	The following resources should be provided:  2.1 Access to relevant workplace where assessment can take place  2.2 Appropriately simulated environment where assessment can take place  2.3 Materials relevant to the proposed activity or tasks
3.	Methods of Assessment	Competency may be assessed through:  3.1 Oral questioning  3.2 Practical demonstration  3.3 Observation
4.	Context of Assessment	Competency may be assessed individually in the actual workplace or through simulated work environment
5.	Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

### **SECURE DATABASES**

UNIT CODE: SEC/OS/CS/CR/05/6/A

## **UNIT DESCRIPTION**

This unit covers the competencies required to secure databases. Competencies includes; identifying types of databases, identifying database threats and vulnerabilities, installing database patches, installing database security management system, monitoring database security, monitoring access control and managing database backups.

## ELEMENTS AND PERFORMANCE CRITERIA

	PERFORMANCE CRITERIA
ELEMENT	These are assessable statements which specify the
These describe the key	required level of performance for each of the
outcomes which make up	elements.
workplace function.	(D. H. a., I. A. H. a., I. A. a., a., a., a., a., a., d. a
workplace function.	(Bold and italicised terms are elaborated in the
	Range)
1. Identify types of	1.1 Database type is identified as per the types of
databases	data it holds
	1.2 Database is established as per the amount of data
	it holds
	1.3 Database is classified as per its distribution
	1.4 Database type is determined in line with the number of users
	X
	1.5 Database is identified as per its operational
	model
	1.6 Cost evaluation is adhered to in database type identification
2. Identify database threats	2.1 Database tests are performed as per the manufacturers manual
and vulnerabilities	
	2.2 Security vulnerabilities and exposures updates are assessed as per the standard operation
	procedures
	2.3 Database is checked for misconfiguration as per
	the manufacturers guide
	3.1 Required patches are identified and acquired as
3. Install databases patches	per manufacturers guidelines
	3.2 Required patches are verified as per the
	manufacture's guidelines
	3.3 Database patches are deployed in a test
	environment as per the organization quality
	assurance policy.
	3.4 Database patches are monitored as per the ICT
	policy
	3.5 Database patches are deployed in the production
	3.3 Database pateries are deproyed in the production

4. Install database security	4.1 Type of database security management system is
management systems	established as per the client's requirements
	4.2 Security management system is established in
	line with the deployment model
	4.3 Hardware sizing is performed in line with database to be secured
	4.4 Security management system is installed and
	configured according to manufacturer's manual
	4.5 Security management system is verified as per
	the guidelines in database security management
	system set up.
	4.6 System integration is performed as per the
	manufacturers manual and clients requirement
5. Monitor database	5.1 Logs are collected and analysed as per the
security	standard operating procedure
·	5.2 Failed log in attempts are monitored as per
	system operation 5.3 Database firewall is configured as per the
	database expected operation
	5.4 Remote access is monitored as per database
	operation
	5.5 Odd hours database access monitored as per the
	its operation
	5.6 Change in user access patterns is monitored in
	with the operation of the database
	5.7 Random change in size of the database is
	monitored as per its normal size.
	5.8 File configuration changes are monitored as per
	database operation.  6.1 Failed log in attempts are identified as per the
6. Manage access control	system operation
	6.2 Privilege account abuse is checked as per the
	access control policy
	6.3 Users access control is managed in line with the
	least privileged principle
	6.4 Active directory rules are adhered to in database
	access

	PERFORMANCE CRITERIA
ELEMENT  These describe the key outcomes which make up workplace function.	These are assessable statements which specify the required level of performance for each of the elements.  (Bold and italicised terms are elaborated in the Range)
	<ul> <li>6.5 Database is accessed by allowed devices as per the organizations policy</li> <li>6.6 Obfuscation is adhered to in database access</li> <li>6.7 Database auditing system is established as per the nature of the data to be secured</li> </ul>
7. Manage database backups	<ul> <li>7.1 Automatic backups are scheduled as per the ICT policy and regulations</li> <li>7.2 Backups are managed in line with the organization ICT policy and industry best practice</li> <li>7.3 Database backups are updated as per the ICT policy</li> <li>7.4 Backups are stored as per the organization set up and industry best practice</li> <li>7.5 Backups are regularly checked in line with the ICT policy</li> <li>7.6 Identify and manage backup solutions in line with the organization policy</li> </ul>

## **RANGE**

This section provides work environments and conditions to which the performance criteria apply. It allows for different work environments and situations that will affect performance.

# REQUIRED KNOWLEDGE AND UNDERSTANDING

The individual needs to demonstrate knowledge and understanding of:

- Troubleshooting techniques
- ICT Infrastructure auditing procedures
- ICT safety and precautious measures
- ICT Prevention measures

- Performance monitoring techniques
- ICT policy
- Causes of hardware and software failure
- Components of ICT Infrastructure
- User training procedures

#### FOUNDATION SKILLS

The individual needs to demonstrate the following additional skills:

- Communications (verbal and written);
- Proficient in ICT;
- Time management;
- Analytical
- Faults troubleshooting
- Problem solving;
- Planning;

- Decision making;
- Report writing;

#### **EVIDENCE GUIDE**

This provides advice on assessment and must be read in conjunction with the performance criteria, required skills and understanding and range.

1.	Critical Aspects
	of Competency

Assessment requires evidence that the candidate:

- 1.1 Database was established as per amount of data it holds
- 1.2 Database was identified as per its operation model
- 1.3 Cost evaluation was performed in database type identification
- 1.4 Database was checked for misconfiguration in line with the
  - manufacturers guide
- 1.5 Database patches were deployed in a test environment as per the organization quality assurance policy.
- 1.6 Database patches were monitored as per the ICT policy
- 1.7 Hardware sizing was performed in line with database to be secured
- 1.8 Database firewall was configured as per the database expected operation
- 1.9 Automatic backups were scheduled as per the ICT policy and regulations
- 1.10Backups were managed in line with the organization ICT policy and industry best practice
- 1.11Backups were stored as per the organization set up and industry best practice

2.	Resource Implications for competent certification	The following resources should be provided:  2.1 Access to relevant workplace where assessment can take place  2.2 Appropriately simulated environment where assessment can take place  2.3 Materials relevant to the proposed activity or tasks
3.	Methods of Assessment	Competency may be assessed through:  3.1 Oral questioning  3.2 Practical demonstration  3.3 Observation
4.	Context of Assessment	Competency may be assessed individually in the actual workplace or through simulated work environment
5.	Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

## UNIT CODE: SEC/OS/CS/CR/06/6/A

## **UNIT DESCRIPTION**

This unit covers the competencies required to administer cyber security system. It involves identifying and analysing information to be protected, establishing systems to be administered, assessing system compatibility, monitoring system performance, documenting system administration report and establishing a cyber-security backup and restoration plan.

## ELEMENTS AND PERFORMANCE CRITERIA

	PERFORMANCE CRITERIA
ELEMENT  These describe the key outcomes which make up	These are assessable statements which specify the required level of performance for each of the elements
workplace function.	(Bold and italicised terms are elaborated in the
	Range)
1. Identify and analyze information to be protected	<ul> <li>1.1 Platform of the information location is established as per the organization policy</li> <li>1.2 Information attributes of the organization is determined in line with the organization policy</li> <li>1.3 Technology used in information storage is established as per the organization policy</li> <li>1.4 Information access control is established in line</li> </ul>
	with organization policy
	1.5 Information or data to be protected is analyzed in line with the <i>Cyber security policy</i> and regulations
2. Establish systems to be administered	<ul> <li>2.1 System is established as per the scope of the information to be protected</li> <li>2.2 Existing <i>threats</i> and trends are considered in establishing the security system to be installed as per the industry best practice</li> </ul>
	2.3 Hardware and software requirements are
3. Asses system's compatibility	<ul> <li>established in line with the system to be installed</li> <li>3.1 <i>Cyber security system</i> is assessed for compatibility with the cyber security devices and equipment</li> <li>3.2 Components specification are checked in line</li> </ul>
	with the entire cyber security system 3.3 System is assessed in line with the manufacturers manual and organizations objectives
4. Monitor system performance	<ul> <li>4.1 System effectiveness is monitored periodically in line with the operation manual and cyber security policy</li> <li>4.2 Simulations are performed during system</li> </ul>

	PERFORMANCE CRITERIA
ELEMENT  These describe the key outcomes which make up	These are assessable statements which specify the required level of performance for each of the elements
workplace function.	(Bold and italicised terms are elaborated in the Range)
	monitoring period as per the organization policy 4.3 Logs are continuously analysed and reported as per the organization cyber security policy 4.4 System security updates and patches are installed according to manufacturer's manuals and organization cyber security policy
5. Document system administration report	<ul> <li>5.1 Installation and operation report are prepared and shared with the relevant parties</li> <li>5.2 Prepared report is filled as per the organizations cyber security policy</li> </ul>
6. Establish a cyber security back up and restoration plan	<ul> <li>6.1 Location for the backup is identified as per the organization policy and industry best practice</li> <li>6.2 Information to be backed up is established as per the organization cyber security policy</li> <li>6.3 Back up platform is established in line with the organization policy</li> <li>6.4 Performance validation of the backups is performed as per the organization cyber security policy</li> <li>6.5 Measures on creating backup schedules are developed in line with the industry best practice</li> </ul>

## **RANGE**

This section provides work environment and conditions to which the performance criteria apply. It allows for different work environment and situations that will affect performance.

Variable	Range
Security threats includes but	Malicious hackers
not limited to:	Industrial espionage
	Employee sabotage
	Fraud and theft
	Loss of physical and infrastructure support
	Errors and Omissions
Cyber Security system	Knowledge management system

Variable	Range
includes but not limited to:	Firewalls instruction detection system

## REQUIRED KNOWLEDGE AND UNDERSTANDING

The individual needs to demonstrate knowledge and understanding of:

- Cyber Security risk management techniques and procedures
- Types of security threats and their control measures
- Cyber security audit procedures
- Cyber security policy
- Strategies for Mitigating risks
- Categories of Security threats
- Penetration testing skills

## FOUNDATION SKILLS

The individual needs to demonstrate the following foundation skills:			
ecision making;			
port writing;			

### **EVIDENCE GUIDE**

This provides advice on assessment and must be read in conjunction with the performance criteria, required skills and understanding and range.

1	Critical Aspects of Competency	Assessment requires evidence that the candidate:  1.1 Considered existing threats and trends in establishing the
		security system to be installed  1.2 System to be installed was established with self-defensive mechanism
		1.3 Components specification were checked in line with the
		entire cyber security system  1.4 System was installed and configured as per the
		manufacturers manual 1.5 Established testing types as per the standard operating
		procedure  1.6 Performed simulations during system monitoring period as
		per the organization policy

© TVET CDACC 2019

_		
		1.7 Continuously analysed logs and reported as per the
		organization cyber security policy
		1.8 Establish back up platforms in line with the organization
		policy
		1.9 Performed validation of the backups as per the
		organization ICT policy
		1.10 Developed back up schedule as per the organization
		cyber security policy
		1.11 Training manual was prepared and shared with the
		system users
2	Resource	The following resources should be provided:
_	Implications	2.1 Access to relevant workplace where assessment can
	for competent	take place
	certification	2.2 Appropriately simulated environment where
	certification	assessment can take place
		2.3 Materials relevant to the proposed activity or tasks
3	Methods of	Competency may be assessed through:
	Assessment	3.1 Observation
		3.2 Oral questioning
		3.3 Practical test in conducting test
		3.4 Demonstration of interpretation of test results
4	Context of	Competency may be assessed individually
	Assessment	4.1 In the actual workplace
		4.2 Simulated environment of the work place
5	Guidance	Holistic assessment with other units relevant to the industry
	information for	sector, workplace and job role is recommended.
	assessment	Ø-

### CONDUCT CYBER SECURITY ASSESSMENT AND TESTING

UNIT CODE:SEC/OS/CS/CR/07/6/A

## **UNIT DESCRIPTION**

This unit covers the competencies required to conduct cyber security assessment and testing. It involves gathering information about organization and its systems, scan and mapping of network, enumerating network resources, exploiting known vulnerabilities, performing social engineering and preparing security assessment and testing report.

## ELEMENTS AND PERFORMANCE CRITERIA

	PERFORMANCE CRITERIA
ELEMENT	These are assessable statements which specify the
These describe the key	required level of performance for each of the
outcomes which make up	elements.
workplace function.	(Bold and italicised terms are elaborated in the
	Range)
	1.1 Types of information required is established
1. Gather information about	according line with the industry best practice
organization and its	1.2 The nature of the target is determined in line with
systems	the information required
	1.3 Search engines are considered in information
	gathering
	1.4 Information gathering is conducted in adherence
	to the target social engineering
	1.5 Information gathering is conducted in line with
	manufacturers guide of the source of the
	information
	1.6 Organization operation platform is established in
	line with industry best practice
2. Scan and map the	2.1 Live hosts are identified as per the standard
network	operation procedure
	2.2 Network topology is drawn based on industry
	best practice
	2.3 Services running on the live hosts are identified
	in line industry best practices
	2.4 Vulnerable points are identified as per the
	services on the host
3. Enumerate target	3.1 Users are identified as per the standard operating
resources	procedure
	3.2 Authorization credentials are established as per
	the organization ICT policy
	3.3 Enumeration in services are established based on
	the organization policy
	3.4 Protocols enumeration is performed as per the

	PERFORMANCE CRITERIA
ELEMENT  These describe the key outcomes which make up	These are assessable statements which specify the required level of performance for each of the elements.
workplace function.	(Bold and italicised terms are elaborated in the Range)
	standard operating procedure  3.5 Work groups are established in line with the network and active directory  3.6 Database is enumerated in line with industry best practice  3.7 Rainbow tables are designed based on industry
4. Exploit known vulnerabilities	<ul> <li>best practice</li> <li>4.1 Exploits are deployed in line with industry best practice</li> <li>4.2 Payloads are prepared and deployed in line with the environment and industry best practice and ethics</li> </ul>
	<ul> <li>4.3 Deploying methods are established in line with the expected target</li> <li>4.4 Access to remote host is maintained per standard operating procedure</li> <li>4.5 Exploitation proof of concept is generated in line with the standard operating procedure</li> </ul>
5. Perform social engineering	<ul> <li>5.1 Methods of manipulating human emotion are exercised as per workplace procedures</li> <li>5.2 System users are manipulated using the system as per the industry best practice</li> <li>5.3 System is manipulated using third party vendors in line with industry best practice</li> </ul>
6. Prepare security assessment and testing report	<ul> <li>6.1 Security assessment and testing reports are prepared in line with the organizations approved format</li> <li>6.2 Security assessment and testing reports are shared with relevant parties as per the organization policy</li> <li>6.3 Security assessment and testing reports are</li> </ul>
	documented and filled according organization filing system  6.4 Security assessment and testing risk mitigation recommendations are prepared and shared with the relevant parties

### **RANGE**

This section provides work environments and conditions to which the performance criteria apply. It allows for different work environments and situations that will affect performance.

Variable	Range

## REQUIRED KNOWLEDGE AND UNDERSTANDING

The individual needs to demonstrate knowledge and understanding of:

- Troubleshooting techniques
- ICT Infrastructure auditing procedures
- ICT safety and precautious measures
- ICT Prevention measures
- Performance monitoring techniques
- ICT policy
- Causes of hardware and software failure
- Components of ICT Infrastructure
- User training procedures

### FOUNDATION SKILLS

The individual needs to demonstrate the following additional skills:		
• Communications (verbal and written);	Decision making;	
• Proficient in ICT;	• Report writing;	
• Time management;		
Analytical		
Faults troubleshooting		
• Problem solving;		
• Planning;		

## **EVIDENCE GUIDE**

This provides advice on assessment and must be read in conjunction with the performance criteria, required skills and understanding and range.

1. Critical Aspects	Assessment requires evidence that the candidate:
of Competency	1.1 Targets nature was determined in line with the information
	required

	<ol> <li>1.2 Types of information required was established according line with the industry best practice</li> <li>1.3 Organization operation platform was established in line industry best practice</li> <li>1.4 Network topology was drawn based on industry best practice</li> <li>1.5 Vulnerable points were identified as per the services on the host</li> <li>1.6 Protocols enumeration was performed as per the standard operating procedure</li> <li>1.7 Authorization credentials were established as per the organization ICT policy</li> <li>1.8 Payloads were prepared and deployed in line with industry best practice and ethics</li> <li>1.9 Exploitation proof of concept was generated in line with</li> </ol>
	the standard operating procedure
	1.10 System users were manipulated using the system as per
	the industry best practice  The following resources should be provided:
2. Resource	2.1 Access to relevant workplace where assessment can
Implications for competent	take place
certification	2.2 Appropriately simulated environment where
certification	assessment can take place
	2.3 Materials relevant to the proposed activity or tasks
3. Methods of	Competency may be assessed through:
Assessment	3.1 Oral questioning
	3.2 Practical demonstration
	3.3 Observation
4. Context of Assessment	Competency may be assessed individually in the actual workplace or through simulated work environment
5. Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.
